Mail Stop: EX/JB
Juno Beach, FL 33408

SUBJECT: POINT BEACH NUCLEAR PLANT – SECURITY BASELINE INSPECTION
REPORT 05000266/2026401 AND 05000301/2026401

Dear Bob Coffey:

On August 27, 2026, the U.S. Nuclear Regulatory Commission (NRC) completed an inspection at Point Beach Nuclear Plant and discussed the results of this inspection with Aaron Streeter and other members of your staff. The results of this inspection are documented in the enclosed report.

No findings or violations of more than minor significance were identified during this inspection.

This letter, its enclosure, and your response (if any) will be made available for public inspection and copying at <http://www.nrc.gov/reading-rm/adams.html> and at the NRC Public Document Room in accordance with Title 10 of the *Code of Federal Regulations* 2.390, "Public Inspections, Exemptions, Requests for Withholding."

Sincerely,

A handwritten signature in dark ink, appearing to read "Michael Ziolkowski".

Signed by Michael Ziolkowski on 09/29/26

Michael E. Ziolkowski, Chief
Division of Reactor Safety
Plant Support Branch
Region III

Docket Nos. 05000266 and 05000301
License Nos. DPR-24 and DPR-27

Enclosure:
As stated

SUMMARY

The U.S. Nuclear Regulatory Commission (NRC) continued monitoring the licensee's performance by conducting a security baseline inspection at Point Beach Nuclear Plant, in accordance with the Reactor Oversight Process. The Reactor Oversight Process is the NRC's program for overseeing the safe operation of commercial nuclear power reactors. Refer to <https://www.nrc.gov/reactors/operating/oversight.html> for more information.

List of Findings and Violations

No findings or violations of more than minor significance were identified.

Additional Tracking Items

None.

INSPECTION SCOPES

Inspections were conducted using the appropriate portions of the inspection procedures (IPs) in effect at the beginning of the inspection unless otherwise noted. Currently approved IPs with their attached revision histories are located on the public website at <http://www.nrc.gov/reading-rm/doc-collections/insp-manual/inspection-procedure/index.html>. Samples were declared complete when the IP requirements most appropriate to the inspection activity were met consistent with Inspection Manual Chapter (IMC) 2201, "Security Inspection Program for Commercial Nuclear Power Reactors." The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel to assess licensee performance and compliance with Commission rules and regulations, license conditions, site procedures, and standards.

SAFEGUARDS

71130.16 - Security Performance

Security Performance (IP Section 03.01) (3 Samples)

The inspectors evaluated security performance during observations of the following activities:

(1) **Access Control**

- The inspectors evaluated the licensee's implementation of access controls through observation of personnel, material, and vehicle searches.
- The inspectors evaluated the licensee's implementation of access controls through observation of access control points and control measures.
- The inspectors evaluated the licensee's information protection and Safeguards Information controls.

(2) **Equipment Testing and Maintenance**

- The inspectors evaluated the licensee's security equipment testing and maintenance program through review and observation of records and testing of the following systems:
 1. Alarm Station Detection Equipment (e.g., CCTV, video capture and alarm console)
 2. Special Purpose Detection Equipment (i.e., metal detector, explosive detector and X-ray)
 3. Physical Barriers (e.g., door, turnstile, biometric reader testing)
 4. Weapons Maintenance
 5. Surveillance, observation, and monitoring as identified in the PSP
- The inspectors evaluated the licensee's perimeter intrusion detection and assessment system testing and maintenance program through review and observation of records and testing.

(3) **Access Authorization and Fitness for Duty**

- The inspectors evaluated the licensee's access authorization records for personnel granted unescorted access to Point Beach Nuclear Power Plant.
- The inspectors evaluated the licensee's fitness for duty records for personnel granted unescorted access to Point Beach Nuclear Power Plant.
- The inspectors evaluated the licensee's access authorization and fitness for duty program design and implementation Nuclear Power Plant.
- The inspectors evaluated the licensee's fitness for duty sample collection implementation at Point Beach Nuclear Power Plant.

Problem Identification and Resolution (IP Section 03.02) (1 Sample)

The inspectors reviewed the implementation of the problem identification and resolution program to identify and correct deficiencies in security risk-significant items.

- (1) The inspectors reviewed entries in the licensee's problem identification and resolution program and security event log covering the period from 08/01/2025 to 08/01/2026. The inspectors reviewed a selection of security program reviews conducted from 08/01/2025 to 08/01/2026.

INSPECTION RESULTS

No findings were identified.

EXIT MEETINGS AND DEBRIEFS

The inspectors verified no proprietary information was retained or documented in this report.

- On August 27, 2026, the inspectors presented the security baseline inspection results to Aaron Streeter and other members of the licensee staff.
