

U.S. Nuclear Regulatory Commission
ATTN: Document Control Desk
Washington, DC 20555-0001

**Subject: Candu Technologies, Inc. Submittal of Licensing Topical Report,
“Quality Assurance Program Description (QAPD) for the Enhanced
Candu 6 (EC6)” (Project No. 99902172)**

30 September 2026

AtkinsRéalis
545 Oakridge Turnpike
Suite 103 & 200
Oakridge, TN, 37830

AtkinsRéalis, via its subsidiary Candu Technologies, Inc. (“Candu”), a Delaware-based corporation, and in coordination with Candu Energy, Inc., the EC6 Design Authority, is pleased to submit the Licensing Topical Report, “Quality Assurance Program Description (QAPD) for the Enhanced Candu 6 (EC6)” for U.S. Nuclear Regulatory Commission (NRC) review and approval pursuant to Title 10 of the Code of Federal Regulations (10 CFR) Part 50, Appendix B.

On August 27, 2026, Candu conducted a public pre-application meeting with NRC staff to discuss pre-submittal information related to the EC6 QAPD Licensing Topical Report and to solicit feedback. On September 14, 2026, NRC provided a summary of the topics discussed in the meeting and the feedback provided by NRC staff (ML26254A329).

This letter and enclosure contain no new or revised regulatory commitments.

If you have any questions or require any additional information, please contact me at Jean.Fleming@atkinsrealisusn.com or (484) 641-0005.
