SUBJECT: AMENDMENT NO. 14 TERMINATING NRC RADIOACTIVE MATERIALS
LICENSE FOR MICHIGAN INTERNAL MEDICINE & CARDIOLOGY
ASSOCIATES, NRC LICENSE NO. 21-32376-01

Dear Dr. Marinescu:

In accordance with your July 19, 2026, request, enclosed is Amendment No. 12 terminating Michigan Internal Medicine & Cardiology Associates' (your) U.S. Nuclear Regulatory Commission (NRC) Materials License No. 21-32376-01.

Your letter is available electronically from the NRC's Agencywide Documents Access and Management System (ADAMS) at Accession No. ML26205A150. The NRC's ADAMS is accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

An environmental assessment for this action is not required since this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 51.22(a)(10).

Please note that NRC staff has reviewed final status surveys for the facilities authorized under the license. Based on its review, the NRC staff has concluded that all licensable radioactive material has been removed from your facilities, and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Based on these conclusions, no further remediation or actions are required with respect to NRC-regulated material at facilities authorized under this license. Your facilities at: (1) 23100 Cherry Hill St., Ste. 7, Dearborn, Michigan, and (2) 2191 South Blvd., Ste. 101, Auburn Hills, Michigan, are suitable for unrestricted use, and your NRC Materials License No. 21-32376-01 is hereby terminated.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS.

Sincerely,
**GIANNA
