Hi, Stacy

I have been responded ot some of these questions in conversations that have taken place over the last few weeks.
Please see my responses in **red** below:

1. Is the FAA determination needed – any hazards >200 ft? If not we would not include in our review.
No hazards >200ft above finished grade.
2. Just a note- the facility would be in EPA Region 4, not Region 6, but the region doesn't need to be listed here.

Authorizing Entity	Permit/ Approval or Regulatory Scope
Federal Aviation Administration	FAA Determination of No Hazard
U.S. Environmental Protection Agency (EPA) - Region VI Dallas, TX	Construction Spill Prevention Control and Countermeasure (SPCC) Plan (40 CFR 112)
U.S. Environmental Protection Agency (EPA) - Region VI Dallas, TX	Operational Spill Prevention Control and Countermeasure (SPCC) Plan (40 CFR 112)

Yes, I noticed that too after I came onboard. I'm updated the Permit Matrix and Tabel 1-2 for completeness and accuracy

3. In the last 3 rows:
 - a. Is any further zoning change needed? Because the city of Oak Ridge had recently updated their zoning, is this still "active"?

Yes, additional zoning will be needed but that will have to go through the Industrial Development Board after the deed restrictions have been lifted, as I understand things.

- b. Same with the bottom row below: confirming a temporary sign permit isn't needed.

The Kiewit env engineer who is providing permitting and licensing support to Project IKE confirmed that the temporary sign is NOT needed.

- c. For the middle one, fire safety permit – please provide info/status update.

City of Oak Ridge Planning & Development	Zoning Approval	Required for construction of a nuclear fuel fabrication facility. Verify if this applies to UEF.	No Permit Required.	Construction	Further coordination needed with City of Oak Ridge to determine if a zoning change is needed.
City of Oak Ridge Planning & Development	Fire Safety Permit	Compliance with fire safety regulations. Initial and regular inspections required for fire suppression systems.	Orano	Construction	
City of Oak Ridge Planning & Development	Temporary Sign Permit	Permit to place temporary signage	Kiewit	Site Clearing	City of Oak Ridge stated verbally that they don't require a temporary sign for construction.

Per Kiewit permit support, discussions with the Oak Ridge City Fire Marshall are ongoing. At this time, the Fire Safety Permit is not needed and I have been told that it will not be needed until vertical construction/final design phase.

4. Please provide any updates to Table 1-3, log documenting interactions – and Appendix 1A: Regulatory Correspondence, if needed.

Updates to table 1-3 will accompany updates to Table 1-2.

5. Is there documentation that the City of Oak Ridge has sufficient capacity accounting for all current and planned future uses, and an agreement or permit for Orano's usage amount can be obtained if needed? This is related to applying parameters from the New Reactor GEIS. This may have been stated in the table of responses on the Sharepoint site, but wanting to see if there is any email or other documentation.

Additional permitting through the City of Oak Ridge will be required as design is finalized. Proeject Ike personnel have been engaged with City of Oak Ridge officials and I am not aware of any capacity concerns with regards to utilities or municipal services.

IKE Program

Hi Greg, specific questions regarding this table are below.

1. Is the FAA determination needed – any hazards >200 ft? If not we would not include in our review.
2. Just a note- the facility would be in EPA Region 4, not Region 6, but the region doesn't need to be listed here.

Authorizing Entity	Permit/ Approval or Regulatory Scope
Federal Aviation Administration	FAA Determination of No Hazard
U.S. Environmental Protection Agency (EPA) - Region VI Dallas, TX	Construction Spill Prevention Control and Countermeasure (SPCC) Plan (40 CFR 112)
U.S. Environmental Protection Agency (EPA) - Region VI Dallas, TX	Operational Spill Prevention Control and Countermeasure (SPCC) Plan (40 CFR 112)

3. In the last 3 rows:

- a. Is any further zoning change needed? Because the city of Oak Ridge had recently updated their zoning, is this still "active"?
- b. Same with the bottom row below: confirming a temporary sign permit isn't needed.
- c. For the middle one, fire safety permit – please provide info/status update.

City of Oak Ridge Planning & Development	Zoning Approval	Required for construction of a nuclear fuel fabrication facility. Verify if this applies to UEF.	No Permit Required.	Construction	Further coordination needed with City of Oak Ridge to determine if a zoning change is needed.
City of Oak Ridge Planning & Development	Fire Safety Permit	Compliance with fire safety regulations. Initial and regular inspections required for fire suppression systems.	Orano	Construction	
City of Oak Ridge Planning & Development	Temporary Sign Permit	Permit to place temporary signage	Kiewit	Site Clearing	City of Oak Ridge stated verbally that they don't require a temporary sign for construction.

4. Please provide any updates to Table 1-3, log documenting interactions – and Appendix 1A: Regulatory Correspondence, if needed.
5. Is there documentation that the City of Oak Ridge has sufficient capacity accounting for all current and planned future uses, and an agreement or permit for Orano's usage amount can be obtained if needed? This is related to applying parameters from the New Reactor GEIS. This may have been stated in the table of responses on the Sharepoint site, but wanting to see if there is any email or other documentation.
