Subject: Response to Your Comment Submission Request for Extension of Comment Period (Exemptions from Materials Licensing)

Ms. D'Arrigo,

On behalf of the U.S. Nuclear Regulatory Commission (NRC), I am responding to your comment submission requesting extension of the comment period for the direct final rulemaking "Exemptions from Materials Licensing" (Docket ID: NRC-2025-1568). We understand your interest in having additional time to prepare your feedback. After careful consideration, however, the NRC is unable to grant an extension of the comment period. The deadline for submitting comments remains as published in the *Federal Register* notice for this rule.

To have any additional comments officially filed and considered by the NRC, please submit it through the Federal e-Rulemaking portal Regulations.gov, following the instructions provided in the *Federal Register* notice for the proposed rule (particularly the "ADDRESSES" section).

Submitting any additional comments via Regulations.gov before the deadline will ensure it is entered into the official docket and given full consideration by the NRC. Thank you for your engagement in the rulemaking process. We appreciate your understanding.
