Subject:	[External_Sender] Re: Holtec Palisades Request for deviation of nuclear safety rulles
Date:	Thursday, October 8, 2026 1:34:21 PM

Hello,
I object to approving Holtec's request to bend the ALARA rules and remove the tilted fuel assembly bundle (DD41) using never-before-tested methods. It's my understanding that this refueling accident has never been experienced before in the history of nuclear power. There has been no time for outside nuclear experts to weigh in on this untested method of fuel bundle removal. As such, please do not approve Holtec's request until outside nuclear experts have assessed this situation, and until the public allowed sufficient time to comment.

Thank you.
