SID-03362	3/25/26	3	Byron	IL	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	3/25/26	Drone	On March 24, 2026, at approximately 2310 CDT, Byron Nuclear Station staff observed a drone flying over the protected area, traveling from the northwest to the southeast direction. The FBI (Rockford Office), FAA (Rockford ATC) and LLEA (Ogle County Sheriff's Department) were contacted. At 0008, security officers and LLEA identified two separate drones flying over the owner controlled area and protected area. Drone activity continued until 0130. Notified R3DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03358	2/9/26	1	Three Mile Island	PA	Independent Spent Fuel Storage Installation	Drone	Released NRC Only	Closed Unresolved	2/10/26	Drone	On February 9, 2026, at 1854 EST, Crane Clean Energy security was contacted by a contracted employee to report a drone flying over the north end of the island. The drone remained in the area for approximately 4–5 minutes before flying offsite toward the north. It had three lights (color unknown) and was flying at an elevation of 25–30 feet. Site security personnel responded but did not observe the drone. At 2046 EST, state police were notified and responded but also did not observe the drone. The FAA was contacted and reported that, two hours earlier, a drone had been reported in the vicinity of Harrisburg International Airport. The FBI was also contacted. Notified R1DO (b)(7)(C) LTAB (email), and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03355	12/19/25	3	Dresden	IL	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/22/25	Drone	At 1755 CST on 12/19/2025, LLEA notified site security that a UAV was identified over the site. A security officer then spotted the UAV (drone) which was approximately 100 feet in altitude with red, green, and white flashing lights. The UAV hovered above the north side of the protected area over the intake structure and then left. It reentered the owner control area on the east side of the plant and left shortly after. Dresden heightened their security posture during the UAV activity. The FAA, FBI, and LLEA were notified. Notified R3DO (b)(7)(C) ILTAB (Email), and the SID Report Internal Group. This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03348	9/27/25	3	Braidwood	IL	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	9/29/25	Drone Flyover	At 1935 CDT on 09/27/2025, a security shift supervisor observed one unmanned aerial vehicle (UAV) equipped with flashing red and white lights over the protected area of the plant. The UAV was seen flying at an altitude greater than 100 feet. The drone loitered for approximately 10 minutes flying in an east-to-west direction over the turbine building before departing to the south. Local law enforcement (Will County Sheriff) and the FBI were notified. The site attempted to contact the FAA. Notified R3DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03347	9/19/25	3	Clinton	IL	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	9/19/25	Drone Sighting	At 2032 CDT on 09/18/2025, a security officer observed 4-5 UAVs equipped with red and green lights east of the plant. A supervisor was dispatched to the area where they reported seeing the UAVs flying approximately 2-3 miles from the plant at an altitude of 200-400 feet. The drones loitered for 5-10 minutes before departing to the east. Notified R3DO (b)(7)(C) LTAB (email), and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03344	9/13/25	3	Clinton	IL	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	9/15/25	Drone Flyover Clinton Power Station	[On 09/12/25] at 2028 CDT, two officers observed 4 to 5 drones, equipped with red and green lights, east of the plant near the flume discharge area. The drones were flying in a circular pattern around the flume area, at an altitude of approximately 300-400 feet. After a brief period, the drones departed the area, with three returning shortly after and exhibiting the same flight patterns. The drones left the area at 2204 and were later spotted by a local law enforcement agency (LLEA) in Dewitt, IL. Notifications were made to the FBI, FAA, LLEA. Notified R3DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03345	9/14/25	3	Braidwood	IL	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	9/15/25	Drone (Braidwood)	"On 09/14/2025 at 1859 CDT, the first of the [unmanned aerial vehicle] UAVs was first observed on the northwest side of the protected area (PA) flying south. It had strobing white and red lights. It was at a height of approximately 100 feet and no other identifying characteristics were able to be observed due to time of day and altitude. The UAV continued south at a steady rate before leaving the PA and the observable sight of the plant. Total approximate time observed being 5 minutes. "The second UAV identified was observed at the northwest side of the PA. It had strobing white and red lights. It was at a height of approximately 100 feet and no other identifying characteristics were able to be observed due to time of day and altitude. It appeared to hover for approximately 1 minute before climbing to such an altitude it was no longer observable." The licensee notified local law enforcement and the FBI. The licensee attempted to notify the FAA, but there was no answer. Notified R3DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution Group (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03346	9/15/25	3	Clinton	IL	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	9/15/25	Drone Flyover	"[On 09/14/2025] at 2041 [CDT], two officers observed 2 drones equipped with red and green lights east of the plant, near the flume discharge area. The drones were flying a circular pattern 300-400 yards from the flume area. The drones were spotted leaving the the area at 2102. "Notifications were made to FBI, FAA, and LLEA." The NRC Resident Inspector will be notified. Notified R3DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution Group (email). * * * UPDATE AT 0301 EDT ON 09/15/2025 FROM (b)(7)(C) TO (b)(7)(C) * * "[On 09/14/2025] at approximately 2110, another officer located on the west side of the plant identified another [drone] with red and white lights flying west over the protected area at approximately 200 feet altitude. The officer tracked the drone over the raw water treatment building over the lake and lost visual as it appeared the drone lights shut off near the route 54 bridge. "Notifications were made to FBI, FAA, LLEA." Notified R3DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution Group (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03341	8/10/25	1	Millstone	CT	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	8/11/25	Drone Activity	On August 10, 2025, at 2305 EDT, Millstone Power Station security observed four drones flying back and forth in an east-to-west direction over the site. Drones were between 3x3 feet to 4x4 feet in size and each drone had three propellers. The drones had red, white, and blue lights and the white lights were flashing. The drones flew at an altitude of approximately 300 feet. The event lasted less than five minutes and no other markings could be identified. The site did not change security posture, and the Waterford Police Department was notified. The FBI and FAA will be notified. Notified R1DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03338	6/21/25	1	FitzPatrick	NY	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	6/22/25	Drone	At 2230 EDT on June 21, 2025, a Fitzpatrick security officer observed a drone flyover near the protected area in the vicinity of the open field between Nine Mile Point and Fitzpatrick. The singular drone turned north and then flew back over the lake. The drone never entered the protected area. Local law enforcement, FAA, and the local FBI were contacted. Notified R1DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03336	6/3/25	2	Nuclear Fuel Services Inc.	TN	Fuel Facility	Drone	Released NRC Only	Closed Unresolved	6/4/25	Drone Flyovers	On 6/3/25, at 2230 EDT, site security observed multiple drones performing flyovers of the facility. All drones displayed navigation lights and appeared to be quadcopters. The drones appeared to be flying at less than 200 feet altitude. No consistent flight pattern was identified. LLEA, FBI, and the FAA will be notified. At the time of the notification, drones were still flying in vicinity of the facility. Notified R2DO (b)(7)(C) ILTAB (email), SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03335	6/2/25	1	Indian Point	NY	Independent Spent Fuel Storage Installation	Drone	Released NRC Only	Closed Unresolved	6/2/25	Drone	On 6/2/25, at approximately 1230 EDT, Indian Point site security personnel observed one (1) drone flying outside the owner controlled area but within the company's property. The drone was small in size and was flying in an east-to-west direction. The drone's altitude is estimated to be at 200 ft and no other identifying features could be perceived. The drone did not loiter in place and was last seen flying over the Hudson River. Local law enforcement (New York State Police), FBI (New York Field Office), and the FAA have been notified. The NRC region will be notified by the licensee. Notified R1DO (b)(7)(C) ILTAB (Email), SID Report Internal Distribution (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03333	5/23/25	2	Nuclear Fuel Services Inc.	TN	Fuel Facility	Drone	ILTAB	Closed Unresolved	5/27/25	Drone Flyover	On 5/23/25, between 2310 and 2343 EDT, site security observed four (4) drones performing flyovers of the facility. All sighted drones displayed navigation lights and one appeared to be a 10x10 ft rotary craft. No consistent flight pattern was identified. LLEA, FBI, and the FAA (email) have been notified. Notified R2DO (b)(7)(C) and ILTAB (email). * * * UPDATE ON 5/29/2025 AT 1830 EDT FROM (b)(7)(C) TO (b)(7)(C) * * During review of video associated with the above sighting, the licensee discovered that a single drone of similar type made a flyover of the facility on May 18, 2025 at approximately 2300 EDT. The drone flew from west to east over the site at an altitude of 300 feet or less and did not loiter. The licensee will notify LLEA, FBI, and the FAA. Notified R2DO (b)(7)(C) and ILTAB (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03328	4/28/25	3	Cook	MI	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	4/28/25	Drone	On April 28, 2025, at 0045 EDT, DC Cook Nuclear Plant reported a drone as observed by a plant security officer. The singular drone was 40 - 50 feet in the air over the owner controlled area to the north and northeast. It was in the area between 0017 and 0022 EDT and had red, white, and green lights. The drone never entered the protected area. Local law enforcement and the local FBI were contacted. Notified R3DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution. This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03326	4/10/25	3	Cook	MI	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	4/14/25	Drone Flyover	On April 10, 2025, at approximately 2021 EDT, two security officers observed a small drone displaying green and white flight lights on the eastern side of the protected area. The drone then flew over the site's ISFSI before contact was lost. Local law enforcement, FBI, and FAA have been notified. Notified R3DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution. This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03324	4/4/25	4	River Bend Station	LA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	4/4/25	Drone Flyover	At 0035 EDT on 4/4/25, a plant operator doing rounds at River Bend Station observed a drone hovering over the turbine building inside the protected area. The drone had green flashing lights. The drone was inside the protected areas for approximately five minutes before exiting. River Bend Security raised their posture to a heightened awareness and notified local law enforcement. At the time of notification, River Bend Security also stated they will notify the Federal Bureau of Investigation and Federal Aviation Administration. Notified R4DO (b)(7)(C) ILTAB (email), SID Report Internal Distribution. This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03322	3/27/25	1	Haddam Neck	CT	Independent Spent Fuel Storage Installation	Drone	Released NRC Only	Closed Unresolved	3/31/25	Drone	One drone was large and the other three were smaller. The drones flew in a constant pattern circling around and inside the perimeter of the site. All drones were flying at 200 to 300 feet and sometimes higher. The drones were continuing to fly over the site as the event was reported two hours later. Local law enforcement, the Federal Aviation Administration, and the state police were notified. Notified R1DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03323	3/28/25	1	Haddam Neck	CT	Independent Spent Fuel Storage Installation	Drone	ILTAB	Closed Unresolved	3/31/25	Drone	On March 28, 2025 at 2121 EDT, Haddam Neck security observed a drone approximately the size of a folding table flying westward over the site at approximately 200 to 250 feet with its lights on. After about 2 minutes the drone changed directions and flew back over the site in an eastward direction. When the site turned their lights off, the drone did the same. There was no change in security posture. Notified R1DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution (email). ***UPDATE AT 0728 EDT ON 03/31/2025 FROM ROBERT DEMARAIS TO KAREN COTTON*** The FAA was notified at 2322 EDT on 03/28/25. Notified R1DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03321	3/25/25	3	Cook	MI	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	3/26/25	Suspicious Drone Activity	On March 25, 2025, at 2128 EDT, D.C. Cook Nuclear Plant security personnel observed two drones flying over the vicinity of the plant. One drone flew in the north-south direction along the beach line. The other drone flew over the east side in a north-south direction before circling back. Both drones were flying at an approximate altitude of less than 400 feet. The whole event lasted for approximately 30 minutes. Security posture did not change in response to the presence of the drones. The drones had flashing red and green lights, but no other markings or design features could be identified. Local law enforcement, the Federal Aviation Administration, and the local Federal Bureau of Investigation office were notified. Notified R3DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03316	3/4/25	2	Summer	SC	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	3/5/25	Drone	On 3/4/2025 at 0545 EST, a plant employee observed a stationary drone above the protected area north east of the reactor building. The drone had quick green and red flashing lights and within five minutes exited the protected area heading west. Security did not change posture during this event but it will be increasing its personnel monitoring of the area where the drone was seen. The Federal Aviation Administration and the Fairfield County Sheriffs Department were notified. A voice mail was left with the Federal Bureau of Investigation. The V.C. Summer Nuclear Station Resident Inspector was notified. Notified R2DO (b)(7)(C) ILTAB (email), and SID Internal Reports Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03315	2/28/25	2	Summer	SC	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	3/3/25	Drone	On February 28, 2025, at 2122 EST, security personnel at VC Summer Nuclear Station observed approximately 4 drones to the north and northwest of the site. The drones were estimated to be 6 feet wide, quadcopter configuration, and flying at 100-150 feet. The drones flew briefly over the north side of the protected area then remained in the owner controlled area prior to departing to the north and northwest at approximately 2222. The site remained in normal / observing security posture. Site security contacted local law enforcement and left voicemails with the FAA and FBI field office. Notified R2DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03310	1/24/25	2	North Anna	VA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	1/28/25	Drone	On January 24, 2025, at approximately 2035 EST, North Anna power station security personnel observed a drone with white/yellow lights just over the edge of the owner controlled area (OCA). The lights on the drone would change brightness at times. A security officer mobile patrol was dispatched to investigate. However, the drone was too far away for officers to make out any distinguishing markings on the drone. The drone approached the edge of the OCA from the northwest direction and hovered over the the edge of the OCA for about 10 minutes. The drone then departed back to the northwest towards a residential area. North Anna power station security did not change their security posture. The Louisa County sheriff's office was notified. The Federal Bureau of Investigation (FBI) and the Federal Aviation Administration will be notified. Notified R2DO (b)(7)(C) ILTAB (Email), SID Report Internal Distribution (Email). * * * UPDATE ON 01/24/25 AT 2150 EST FROM (b)(7)(C) TO (b)(7)(C) * * * Additional drone activity was observed at North Anna power station. Five additional drones were seen hovering on the east side of the protected area. Local law enforcement and FBI have been notified. The Federal Aviation Administration will be notified. Notified R2DO (b)(7)(C) ILTAB (Email), SID Report Internal Distribution (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03309	1/23/25	4	Arkansas Nuclear One	AR	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	1/24/25	Drone	On 1/23/25 at 1814 CST a drone with flashing red lights was hovering for about 10 minutes above the generation support building (GSB) in the owner controller area. The licensee was not sure of the drone size or elevation above the GSB. The site changed security posture from normal to elevated. The licensee notified LLEA and FBI, and will notify NRC resident inspector and FAA. Notified R4DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution REDACTED (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03308	1/23/25	1	Millstone	CT	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	1/23/25	Drone	On 1/23/2025 at 0045 EST, a drone flew over the protected area traveling from east to north at an altitude of 120-150 feet. The drone was a rotary wing type, 3 to 4 feet wide, and had red and green lights. The site did not change security posture. Millstone security notified local law enforcement. The FBI and FAA will be notified. Notified R1DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03307	1/21/25	1	Millstone	CT	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	1/22/25	Drone	On 01/21/2025 at 2018 and 2036 EST, a drone flew over the protected area heading east to west over the containment at an altitude of about 150 feet. The drone hovered over the intake for a few minutes before leaving the site. The drone was about 5 feet wide with 2 white and 1 red lights. The site did not change security posture. The shift manager, local law enforcement, and security management were notified. The FAA, FBI, and the NRC Resident Inspector were notified. Notified R1DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution REDACTED (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03306	1/18/25	4	Arkansas Nuclear One	AR	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	1/21/25	Drone	On January 18, 2025, at 2003 CST, Arkansas Nuclear One observed multiple sightings of a drone flying from the west side of the security owner-controlled area towards the protected area. The drone had white, blue, and red lights. The drone was estimated to have operated less than 500 ft. in elevation. At 2008 CST, local law enforcement (LLEA) was notified. LLEA responded to the site and conducted patrols. At 2010 CST, the FBI was informed. The NRC Resident Inspector has been notified. Notified R4DO (b)(7)(C) ILTAB (Email), SID Report Internal Distribution (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03305	1/11/25	4	River Bend Station	LA	Power Reactor - Operating	Drone	Released All	Closed Unresolved	1/11/25	Drone Flyover	On January 11, 2025, at 2048 CST, River Bend security observed a drone with white lights above the security owner controlled area (SOCA). The lights on the drone were so bright the officer could not make out any other distinguishing markings on the drone. The drone hovered over the west side of the plant for about 10 minutes and then exited the SOCA flying north. River Bend security entered heightened awareness in response to the drone sighting. The West Feliciana Parish Sheriffs Office and the Federal Bureau of Investigation were notified. The Federal Aviation Administration will be notified. Notified R4DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03304	1/8/25	3	Prairie Island Station	MN	Power Reactor - Operating	Drone	Released All	Closed Unresolved	1/10/25	Drone Flyover	On January 8, 2025, at 1817 CST four drones were identified flying around the Prairie Island owner controlled area at all four quadrants of the licensee's property. The drones crossed into the protected area from the owner controlled area about two times. Prairie Island security entered into an elevated posture based off of suspicious activity, but did not make a code level elevation. LLEA was notified and responded, but were unable to identify to drone operators. Prairie Island security stood down from the elevated posture at 1901 CST when the drones left the area. Notified R3DO (b)(7)(C) and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03301	1/6/25	4	River Bend Station	LA	Power Reactor - Operating	Drone	Released All	Closed Unresolved	1/8/25	Drone	On January 6, 2025, at 1746 CST, River Bend security observed approximately 5 drones flying over the reactor building before being visually lost to the south at 1750. The drones appeared as rectangular and black. No lights were observed. The approximate altitude was 100 feet above the reactor building. The licensee heightened the security posture awareness after the drone sightings. The licensee notified the West Feliciana Sheriff department, FAA, and the FBI. Notified R4DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03302	1/7/25	4	River Bend Station	LA	Power Reactor - Operating	Drone	Released All	Closed Unresolved	1/8/25	Drone Sighting	On January 7, 2025, at 0115 CST, River Bend security observed red and white flashing lights on a drone flying over the alpha cooling tower for 10 minutes. The licensee heightened their security posture awareness after the drone sighting. The licensee notified West Feliciana Sheriff department, FAA, and the FBI. Notified R4DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03303	1/7/25	1	Millstone	CT	Power Reactor - Operating	Drone	Released All	Closed Unresolved	1/8/25	Drone	Millstone security sighted a single drone over their protected area (PA). The drone was approximately 3 feet wide, square, and had white lights. The first sighting occurred at 1815 EST over the water intake. The drone then transited from east to west over the PA, ranging in altitude from 60-150 feet, hovering briefly over the unit 3 containment building, before departing to the west at 1830. Millstone security notified the control room, site management, and the Waterford and East Lyme Police Departments. Notified R1DO (b)(7)(C) ILTAB (email), and SID Report Internal Distribution (email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03299	1/2/25	4	River Bend Station	LA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	1/6/25	Drone	On January 2, 2025, at 1810 CST, River Bend security spotted a drone flying over the owner controlled area. The drone flashed red and green lights with a white LED light. The drone was spotted by security personnel who observed it east of the plant, outside the cooling tower area, then it was visually lost beneath the tree line. Local law enforcement, the Federal Aviation Administration, and the Federal Bureau of Investigation was notified. Notified R4DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03296	1/1/25	4	River Bend Station	LA	Power Reactor - Operating	Drone	Released All	Closed Unresolved	1/6/25	Drone Flyover	On January 1st, 2025 at 0639 CST, River Bend security was notified by another employee there were six drones flying 2000 feet over the protected area. Security heightened their posture in response to the notification. Approximately five minutes later, the same employee called security back to report the drones had left the protected area and owner controlled area. The caller did not notice any distinguishing markings or lights on the drones. Local law enforcement, the Federal Aviation Administration, and the Resident Inspector were notified. The Federal Bureau of Investigation was contacted. Notified R4DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03297	1/1/25	4	River Bend Station	LA	Power Reactor - Operating	Drone	Released All	Closed Unresolved	1/6/25	Drone	On January 1st, 2025 at 1952 EST, River Bend security notified the NRC that there was a drone flying over the owner controlled area. Security heightened their posture in response to the presence of the drone. The drone was about six feet in diameter and flashed red and green lights which became a white light. Local law enforcement, the Federal Aviation Administration, and the Resident Inspector were notified. The Federal Bureau of Investigation was contacted. Notified R4DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03295	12/31/24	4	River Bend Station	LA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	1/6/25	Drone	On December 31, 2024, at 1831 CST, River Bend Station observed the activity of one drone as observed by a security officer. It flew over the west side of the owner controlled area then departed to the south. Local law enforcement were informed at 1833, arrived and patrolled on site at 1848, then departed at 2045. The FAA and FBI were also notified. Notified R4DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution REDACTED (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03294	12/30/24	4	River Bend Station	LA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/31/24	Drone	On 12/30/24 at 2025 CST, a drone flew into the protected area (PA) from the north heading south at approximately 200 feet in altitude. After two minutes within the PA, the drone flew south outside the PA, and remained in the owner controlled area hovering at the same altitude during the time of the report was being made. Security lost visual contact with the drone as it had lowered altitude behind the tree line at 2058 CST. The local law enforcement agency (LLEA) and FBI were contacted and LLEA were in route to the plant. The FAA nor the Resident Inspector were contacted. The drone was three to four feet wide with no distinguishable markings. The drone had four propellers with a middle body. The drone had solid green lights on one side and solid red lights on the other side with a flashing white light in the middle. The plant's security posture was changed from normal to heightened. Notified R4DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution REDACTED (email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03292	12/29/24	4	Comanche Peak Steam Electric Station	TX	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/30/24	Drone	At 1959 CST, on 12/29/2024, two nuclear equipment operators reported to the shift manager that they visually observed a drone fly over the owner controlled area (OCA)/protected area (PA) about 400 feet above the turbine buildings travelling in a straight line south to north, and lost from sight exiting the OCA. The frame and body of the drone were not visible and no distinguishing markings were visible (only the flight lights). The total duration of the flight was less than 3 minutes. The security shift supervisor was informed and determined that this event is loggable per the memorandum of understanding between the NRC, Region IV, and Luminant Power. Security did not increase their security posture and the flyover did not reach any EP threshold for security events. The Resident Inspector will be notified. Local law enforcement agency and FAA were notified. FBI was not notified. Notified R4DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution REDACTED (email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03290	12/24/24	4	River Bend Station	LA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/30/24	Drone	On December 24, 2024, at 0550 CST, River Bend Station observed activity of one drone. The drone was 5 - 6 ft. in diameter, and in the area for 3 - 5 min as observed by a security officer. It flew over the turbine building and the standby cooling tower. Local law enforcement were informed who are patrolling the area. Security management were also informed. Notified R4DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution REDACTED (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03293	12/29/24	3	Perry	OH	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/29/24	Drone	At 2034 EST, on 12/29/24, security officer, [REDACTED], noticed a drone crossing into the protective area heading from south to north. The drone hovered around the cooling tower for 2 minutes at approximately 500 feet. Then the drone continued north. The security officer lost visibility of the drone due to steam from the cooling tower. There were no visible markings on the drone, only red blinking lights. Security did not change security posture. Security did contact the local law enforcement agency and intends to contact the FAA, FBI, and Resident Inspector. Notified R3DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution REDACTED (email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03289	12/22/24	4	Arkansas Nuclear One	AR	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/23/24	Drone	On December 22, 2024, at 2339 CST, it was reported to the shift supervisor that there was a drone flying over the protected area. Upon notification, the shift supervisor responded to attempt to get a visual of the activity due to it not being able to be seen on camera. The security force was placed into heightened awareness at 2345. It was reported the drone flew over the Unit 1 turbine building and between the two reactor buildings, from the east to the west. Sight was lost of the drone behind the administration building heading towards the cooling tower. No further activity had been reported at this time. Control rooms and security supervision were notified of the situation. Heightened awareness was secured at 0025 on December 23, 2024. The NRC, Headquarters Operations Center was contacted to make a voluntary report. Security re-entered heightened awareness due to an additional sighting of the drone at 0046. The drone was sighted flying over the switchyard flying in the direction of Russellville. Pope county sheriff (PCSO) was called at 0059. The PCSO dispatched an officer to drive around the perimeter to identify anyone flying the drone. Notified R4DO (b)(7)(C) ILTAB, SID Internal This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03288	12/21/24	3	Braidwood	IL	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/23/24	Drone Flyover	On 12/21/2024 at 1852 CST, Braidwood Generating Station security noticed two drones greater than 100 feet above the owner controlled area (OCA). The first drone had red and white blinking lights and flew near the switchyard where it hovered for about 20 minutes. The first drone exited the OCA moving east and then south out of sight. The second drone had green and white blinking lights and was observed above the southwest corner of the OCA where it hovered for about 25 minutes. The second drone exited the OCA flying east out of sight. Security did not change posture before, during, or after the drone sighting. The Will County Police Department and the Federal Bureau of Investigation were notified. The FAA was contacted but they could not be reached for notification. Notified R3DO (b)(7)(C) ILTAB (Email), SID Reports Internal Distribution (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03287	12/18/24	1	Seabrook	NH	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/20/24	Drone	On 12/18/2024, from 0015 EST, Seabrook Station Nuclear Power Plant experienced a drone in its vicinity. A security officer in the vicinity of the demineralizer tanks observed a drone in the sky generally to their south. The drone was static in place for a few minutes. The officer departed the area to make notifications to shift supervision regarding the sighting. The officer went to a nearby security post to make notifications where they again saw the drone generally to the southwest while looking over the Unit 1 turbine building. The drone was fairly high in the sky resulting in the officer being unable to obtain any clear markings or size estimation. The drone did not appear to be over the protected area, but was rather over the southern marsh area and the western sections of the owner controlled area toward the Seabrook Transfer Station. It was later spotted again over the northern marsh travelling generally east where observation was lost. It is difficult to estimate exactly where it was, but it does not appear to have been over the protected area. The drone was in the vicinity for approximately 35 - 40 min before observation was lost. Local law enforcement and the Federal Aviation Administration were contacted. Notified R1DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution REDACTED (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

ID	Date	Region	Site/Licensee Name	State	Reporting Organization	Report Category	Current Phase	Status	Last Updated	Subject/Short Description	Description of Incident
SID-03286	12/17/24	2	Surry	VA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/20/24	Drone	On December 17, 2024, Surry Power Station observed three drones. It's believed to be the same three drones as in the previous reports. At time 1956 EDT, Security Officer (SO) [DELETED] reported seeing a drone over the training center, north of the discharge canal. Assistant Shift Leader (ASL) [DELETED] went to the base of bullet resistant enclosure-1 (BRE1) to confirm the siting but was unable to confirm if it was a drone or not. At time 2016, SO [DELETED] confirmed seeing a drone located overtop the Surry Nuclear Information Center (SNIC). The drone was moving west towards the river and continued west until out of sight. Also at time 2016, SO [DELETED] confirmed seeing a drone moving west over the protected area (PA). The first sighting was near the construction yard and continued west over Unit 1 and 2 containments. The drone continued west over the admin building until it was out of sight. At time 2017, Security Shift Supervisor (SSS) [DELETED] confirmed seeing a drone overtop of the switchyard. The drone moved west until out of sight. At time 2033, security supervision notified Operations Shift Manager [DELETED]. At time 2035, security supervision notified Fort Eustis control tower of drone sightings. The Fort Eustis air traffic controller said there is no military drone activity in our area. Fort Eustis control tower informed us that they would be making contact with Norfolk Radar Approach Control Center. At time 2045, security supervision notified Surry County Sheriff's Department of the drone sightings. At time 2050, security supervision notified Corporate Security TRAC [DELETED]. At time 2057, North Anna Power Station contacted us to inform us that their LLEA notified them of drone sightings in their area. At time 2118, SO [DELETED] at the check point reported Surry County Sheriff's Department Deputy arrived at the check point. The deputy left at 2130. From time 2125 until 2152, a cleanup operation search for drone travel paths over the PA was conducted. Nothing was found in the areas searched. Notified R2DO (b)(7)(C) ILTAB Distribution (email), SID Report Internal Distribution REDACTED (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03285	12/15/24	1	Millstone	CT	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/18/24	Drone Flyover	At approximately 0130 EST, on 12/15/2024, Millstone Power Station security observed a large (5 ft. across), V-shaped drone on the southeast perimeter of the plant near the spent fuel storage facility. When security approached the fence line to obtain a better view of the drone, it began flying in a westerly direction. The drone flew over the Unit 2 reactor building before departing over Niantic Bay. The drone was observed over the site for approximately 5 minutes. Millstone security did not change security posture during or after the incident. Waterford Police Department was notified. Notified the R1DO (b)(7)(C) ILTAB (Email), and SID Report Internal Distribution (Email).
SID-03284	12/14/24	1	Millstone	CT	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/18/24	Drone Flyover	On 12/14/24, at 1755 EST, Millstone Power Station security observed seven more drones that briefly entered the owner controlled area (OCA) and then exited. Two of the drones briefly entered the protected area. The drones are approximately three feet by three feet quadcopters with green and red flashing lights. The drones left the OCA but could still be observed right outside the west bay door. Millstone security did not change security posture during or after the incident. Waterford Police Department was notified. Notified the R1DO (b)(7)(C) ILTAB (Email), and SID Report Internal Distribution (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

ID	Date	Region	Site/Licensee Name	State	Reporting Organization	Report Category	Current Phase	Status	Last Updated	Subject/Short Description	Description of Incident
SID-03283	12/14/24	1	Hope Creek	NJ	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/18/24	Drone Flyover	On 12/14/2024, at 1718 EST, Hope Creek Generating Station security observed three drones in the protected area. One larger drone was sighted hovering near the cooling tower in the owner controlled area (OCA) and then flew into the protected area near two smaller drones hovering above Unit 1. All of the drones are similar in design and appearance to the drones in yesterday's report (SID-03280). The drones were all approximately 400 feet in the air with red and white flashing lights. Hope Creek did not change security posture during or after this incident. The Lower Alloways Creek Police (LACP), Federal Bureau of Investigation (FBI), and Federal Aviation Administration were notified with LACP responding to the site. The FBI opened an active investigation into the drone sightings. Notified R1DO (b)(7)(C) ILTAB (Email), SID Report Internal Distribution (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03282	12/13/24	1	Millstone	CT	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/18/24	Drone Flyover	On 12/13/2024, at approximately 2245 EST, a security officer observed an unmanned aircraft (drone) in the area west of the Unit 1 intake. The security officer stated that the drone appeared approximately 3 feet by 4 feet in diameter, displayed red and blue lights, and produced no sound with no visible markers. Additionally, the security officer stated that the drone traveled east at a slow rate of speed, over the Unit 1 turbine building area and lost sight as it traveled past the building. The drone appeared to flyover the protected area and owner controlled area. The central alarm station (CAS), secondary alarm station (SAS), and the response force were notified of the incident. Unit 3 and Unit 2 shift managers were advised of the situation along with both Dominion and Allied management. Waterford Police Department (WPD) were advised and responded to the site. At approximately 2310 EST, an additional drone siting was made in the area of the checkpoint. It was unknown if it was the same drone. WPD stated that the drone was tracked but eventually lost sighting. WPD advised that they contacted with the Federal Aviation Administration via Bradley and Providence airports regarding the incident and generated case # 2400041622. An inspection of any accessible travel path was conducted by security supervision. There was no change to security posture. Millstone Protection Services notified the NRC Resident Inspector and the NRC Region I office. Notified R1DO (b)(7)(C) ILTAB (Email), SID Report Internal Distribution (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03281	12/13/24	2	Surry	VA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/18/24	Drone	On 12/13/2024, at 1744 EST, a security officer reported a white light of the drone hovering above the gate, then the drone moved west with a blinking red light in addition to the white light. The drone passed over the crane enclosure until it disappeared but did not cross into the protected area. The security supervision notified Fort Eustis Control Tower of the drone sightings at 1752 EST, and the Fort Eustis Air Traffic Controller said that there was no military drone activity in the area. The security supervision notified the Norfolk Radar Approach Control Center that the drone had an unknown size and an altitude in excess of 100 feet. The air traffic controller had no information to report. At 1803 EST, the security supervisor notified Surry County Sheriff's Department of the drone sightings. Afterwards, a search of drone travel paths was conducted over the protected area. No evidence was found in the area searched. Notified R2DO (b)(7)(C) ILTAB (email), SID Internal (email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03280	12/13/24	1	Hope Creek	NJ	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/18/24	Drone Flyover	On 12/13/2024, at 2100 EST, Hope Creek Generating Station security observed two drones exiting the protected area into the owner controlled area. Both drones were 400 feet in the air with red and white flashing lights and were approximately the size of a small motor vehicle. Hope Creek did not change security posture during or after this incident. The Lower Alloways Creek Police, Federal Bureau of Investigation, and Federal Aviation Administration were notified. Hope Creek will notify the United States Coast Guard and the Hope Creek control room. Notified R1DO (b)(7)(C) ILTAB (Email), SID Report Internal Distribution (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03279	12/13/24	1	Indian Point	NY	Power Reactor Decommissioned	Drone	Released NRC Only	Closed Unresolved	12/18/24	Drone Flyover	On 12/13/2024, at 1900 EST, Buchanan Village Police Department contacted Indian Point security to notify them of a drone they observed in the owner controlled area (OCA). Security dispatched an officer and supervisor who observed two drones. The first drone was approximately 300 feet above Unit 3 with green and white flashing lights. The second drone was larger than the first and was approximately 200 feet above the parking area next to Unit 3 with a single red flashing light. Both drones left the OCA heading northeast after being observed. Indian Point did not change security posture during or after this incident. The New York State Police (NYSP), Federal Bureau of Investigation, and Federal Aviation Administration were notified with NYSP responding to the site. Notified R1DO (b)(7)(C) ILTAB (Email), SID Report Internal Distribution (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03278	12/12/24	2	Surry	VA	Power Reactor Operating	Drone	Released NRC Only	Closed Unresolved	12/18/24	Drone	On 12/12/24, at 1805 EST, an off duty security officer reported a drone with a solid white light near an owner controlled area (OCA) checkpoint. The security supervisor notified Fort Eustis control tower of the drone activity at 1825, and they confirmed that the drone appeared on radar at approximately 300 feet. The security supervisor also notified Norfolk Radar Approach control center at 1834, but they had no additional information. At 1910, an on shift security officer sighted a drone near the Gravel Neck entrance road travelling southeast while gaining altitude and departing the area. This drone appeared to have a cluster of lights. Surry County Sheriff's Department arrived at the checkpoint at 1950 and departed at 2110. At 1952, a Surry County deputy reported three drones near Old Brickyard Road, between Gravel Neck and Tyler's Beach, before they crossed from Surry County into Isle of Wight County. Notified R2DO (b)(7)(C) ILTAB (email), SID Internal (email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03277	12/12/24	1	Salem	NJ	Power Reactor Operating	Drone	Released NRC Only	Closed Unresolved	12/18/24	DRONE FLYOVER	Two drones were sighted flying within the Salem and Hope Creek nuclear power plants' owner controlled area (OCA) at approximately 1730 EST. It is unknown from which direction the drones arrived from, but it is suspected the drones entered the OCA from the north. The drones did not enter the protected area and do not appear to be operating in a threatening posture. The drones appear to be flying at an altitude of approximately 500 feet and no identifying markings were able to be sighted. The drones each have a steady white light and a blinking red light. The drones moved to the outskirts of the OCA at approximately 2000 EST and as of 2030 EST they remained on the edge of the OCA. The licensee notified both local law enforcement and the FBI of this event. Notified R1DO (b)(7)(C) and ILTAB (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03276	12/9/24	2	Surry	VA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/18/24	Multiple Drone Flyover	Multiple Unmanned Aircraft System (UAS) / Drone Flyovers The following information was provided by the licensee via phone and email: "On 12/10/2024, at 1805 EST, multiple drones were spotted over Surry Nuclear Power Plant's owner controlled area (OCA). "First Visual interaction- (5 UAS): "At 1805, outgoing security officer called via cell phone into security office stating they saw a potential drone flying from the checkpoint towards bullet resistant enclosure (BRE) 3. "At 1814, checkpoint officer [DELETED] called in what appeared to be a drone with solid green and red lights and a blinking white light flying above the tree line from Gravel Neck moving in a northeast direction. "The drone was identified hovering approximately 100 feet over the area of BRE 3 by checkpoint officer [DELETED], who maintained visual of the drone from the security checkpoint until drone appeared to turn lights off, at this time visual was lost. "At approximately 1824, Assistant Shift Leader [DELETED] identified a second drone above the admin building moving generally south towards the checkpoint. "Checkpoint officers identified this drone, which then proceeded to move over BRE 5 then west towards the security firing range where they then lost sight of the drone. "At 1843, BRE 2 Officer [DELETED] observed red blinking lights flying low following each other spread apart, east past construction side moving south towards warehouse 8 and visual was lost when they moved past the Surry rad-waste facility which obstructed visual. "At approximately 1857, an additional possible drone was identified with a solid white light flying westerly directly towards the checkpoint directly above the tree line from the gravel neck area. Officers [DELETED] and [DELETED] communicated information to each other and after physically pointing at drone which at this time appeared to be at the edge of tree line, light turned off and officers lost visual of possible drone at this time. "Second Visual interaction- (3 UAS): "At approximately 1949, Officer [DELETED], while conducting an owner controlled area mobile patrol observed a larger drone with red, green, and white lights hovering north of the construction side. While communicating this activity to supervision a triangular solid appearing shaped drone flew over Officer [DELETED] heading from the Hog Island area, moving east. Simultaneously, Officer [DELETED] observed a third drone moving east from the firing range vicinity. "BRE 1 Officer [DELETED] visually confirmed the third drone, reporting it moved east from the firing range towards the managers parking lot directly in front of BRE 1 where it then hovered, then ascended and moved out of her line of sight. "Officer [DELETED] observed this drone move east after ascending. Officer [DELETED] observed the two smaller drones aerially link up while moving further east, flying in a zig zag pattern opposite of each other laterally north to south around the larger drone that was initially spotted north of construction side (generator service building vicinity). All three drones flew east by northeast until visual was lost. The following additional information was obtained from the licensee in accordance with Headquarters Operations Officers Report Guidance: Local law enforcement, State police, NRC Region 2, have been notified. The FBI will be notified. Notified R2DO (b)(7)(C) LTAB (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03275	12/3/24	2	Surry	VA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	12/4/24	Drone Flyover	On December 3, 2024, between 2045 and 2400 EST, multiple drones were observed passing over the owner controlled area and protected area from various directions. The drones were at approximately 150 feet elevation with blinking white lights. The licensee increased their security posture and informed the Surry County Sheriff's Department, Fort Eustis, and the local FBI. In addition, the licensee notified the Resident Inspector and Region II. Notified R2DO (b)(7)(C) and ILTAB (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03271	10/25/24	4	Diablo Canyon	CA	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	10/28/24	Drone Flyover	"On October 25, 2024, at approximately 1936 PDT, security entered a Code Yellow following the report of a drone. A security officer walking on the West side of the Main Protected Area (PA) noticed a drone hovering in the owner controlled area (OCA) over the ocean directly West of the plant. The officer then observed the drone move East toward the plant and cross into the Main PA just over the discharge where it paused and hovered for a brief moment (approximately 2 seconds). The drone then moved toward the U-2 Buttress where it turned South and slowly proceeded toward the administration building. The drone continued South until it exited the Main PA and reached Lot 1. Total time the drone was in the PA was approximately 5 minutes. The drone maintained an altitude of around 200 feet, did not attempt to land, and there was no payload visible. The drone was roughly 2 to 3 feet in size, and it appeared to have small wings. The drone was brightly lit, with multiple amber colored lights on the body and on the wings. Additionally, the officer reported the drone was extremely quiet with no buzzing sound present. The drone remained in the area of Lot 1 for a couple of minutes before exiting the plant site. Officers with OCA cameras were directed to scan the OCA for possible operators, but none were observed. The shift manager was notified, and was provided updates throughout the event. Attempts were made locally to identify the drone utilizing (b)(7)(E) but was unsuccessful. (b)(7)(E) was contacted offsite and a request was made to identify the drone via the historical map, however no drone activity was observed. (b)(5) (b)(5) The last drone activity was reported at 1945 PDT, and security exited the Code Yellow at 2029 PDT. This is a security loggable event per SP-106." Notified R4DO (b)(7)(C) and ILTAB (email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03269	10/11/24	1	Indian Point	NY	Power Reactor - Decommissioned	Drone	Released NRC Only	Closed Unresolved	10/16/24	Drone	While an operator was making rounds, they heard and observed a small drone about thirty feet in the air next to Unit 1. The drone flew south until it was no longer visible. The drone was less than one foot in diameter with two lights. One of the lights was green. The security shift supervisor will notify the NRC Project Manager. Notified R1DO (b)(7)(C) ILTAB (Email), SID Report Internal Distribution (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03267	10/7/24	3	Prairie Island Station	MN	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	10/7/24	Drone Flyover	On October 7, 2024, at 0056 CDT, a drone made several passes over Prairie Island Nuclear Generating Station's protected area. The drone was observed by a plant operator on rounds who captured video on their phone. The drone had lights on and flew over the turbine and auxiliary buildings. Local law enforcement was informed which will made courtesy rounds in the local community areas. Notified R3DO (b)(7)(C) and SID Report Internal Distribution (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03265	10/4/24	3	Prairie Island Station	MN	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	10/4/24	Drone Flyover	At 0202 CDT on 10/04/2024, security observed a drone with three blinking blue lights, fly over the protected area. The drone did not stop and line of sight was lost as it crossed the Mississippi River. Prairie Island Security notified SOC, LLEA, FBI, FAA, and OSM. The NRC Resident Inspector will be notified. Notified R3DO (b)(7)(C) ILTAB (Email), and HOO Redacted SIDS Internal Group (Email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03258	8/27/24	2	Oconee	SC	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	8/30/24	Suspicious activity (Drone)	On August 27, 2024, at 2039 EDT, 2 drones were seen flying over the south end of the protected area. The drones proceeded west and left the area. At 2115 EDT, 2 drones returned to the area and proceeded to circle the protected area in a random fashion until 2130 EDT. At 2130 EDT, both drones exited the area to the south. The drones appeared to be small recreational type. Immediate notifications were made to the Oconee operations manager, security director and site vice president. NRC Resident Inspector and LLEA were also notified. Notified R2DO (b)(7)(C) ILTAB (Email), and the HOO SID Report Internal Distribution List (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03257	8/10/24	1	Maine Yankee	ME	Independent Spent Fuel Storage Installation	Drone	Released NRC Only	Closed Unresolved	8/12/24	Suspicious activity (drone)	On August 10, 2024, at 1855 EDT, Maine Yankee security personnel observed an SUV that was parked on a main public road near the site. The driver of the SUV was operating a drone. The drone hovered over a site parking lot for approximately 10 minutes. Site security could not identify any markings on the drone and did not approach the individual. The licensee contacted local law enforcement (LLEA) and the site elevated their security posture. Notified R1DO (b)(7)(C) ILTAB (Email), and the HOO SID Report Internal Distribution List (Email). * * * UPDATE ON 08/10/2024 AT 2202 EDT FROM (b)(7)(C) TO (b)(7)(C) * * * The following information was provided by the Maine Yankee Independent Spent Fuel Storage Installation (ISFSI) via email: “At approximately 1855 EDT, an unknown subject parked a 4-door black Chevy SUV (possible Trax model) outside the main entrance to the site. The vehicle had a ‘Tucker’ dealership placard on the front and temporary dealership plates (possible plate number ‘2804220’) on the back. The subject took cell phone pictures and/or video of the site, then at 1859 EDT, the individual launched a drone that hovered over the ISFSI site. The subject ignored public announcement (PA) warnings to leave the area. The shift supervisor observed the drone outside, hovering over the property – flying up and down over a field northwest of the site’s office building parking lot. Local law enforcement (LLEA), FBI, NRC, and the Federal Aviation Administration (FAA) were notified of the incident. At 1904 EDT, the subject recovered the drone and departed east in their vehicle to a dead end boat ramp/launch. At 1909 EDT, the subject’s vehicle emerged from the dead end and passed the [ISFSI] entrance en route to Route 1 in Wiscasset. At 1910 EDT, the subject departed in their vehicle and LLEA was unable to intercept the subject. The site was placed on elevated alert and security procedures implemented.” Notified R1DO (b)(7)(C) ILTAB (Email), and the HOO SID Report Internal Distribution List (Email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03251	6/25/24	4	Rancho Seco	CA	Independent Spent Fuel Storage Installation	Drone	Released NRC Only	Closed Unresolved	6/26/24	Drone Flyover	There was a flyover of a UAS around 0537 PDT on 6/25/24, and it was determined that due to the flight path and observed flight pattern that no suspicious activity was involved. We are making the below voluntary report and are keeping local law enforcement and local FAA informed. •Site location: Rancho Seco ISFSI, Sacramento, CA •Flyover location (e.g., owner-controlled area, protected area, cooling tower, power block): Owner controlled area and PA. •Date and time of day: 6/25/2024 at 5:36-5:39 am •Duration of flight: Less than 3 minutes total •Number of UAS: 1 – determined by flashing lights during flight. •Description (e.g., size, fixed-wing, multi-rotor) – Unavailable due to height of UAS during time of flight and low cloud coverage. •Types of maneuvers; Flyover •Pictures and video of the UAS flyover, if obtained: None obtained due to height of UAS •Payload, if observed (e.g., camera, attachments): unable to determine to due height of UAS and low visibility. •Any damage to licensee property or injuries to personnel: No damage to property or personnel. •UAS identification number, if observed: Not observed •Operator identification, if possible: No identifying marking observed on UAS Notified R4DO (b)(7)(C) ILTAB (email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03250	6/19/24	1	Three Mile Island	PA	Power Reactor - Decommissioned	Drone	Released NRC Only	Closed Unresolved	6/21/24	Drone flyover	On 6/19/2024 at 1510 EDT, a black quadcopter drone was observed flying over the Constellation property. No visible lights or markings were observed due to the distance away from the drone. Since the drone flew southeast away from the property, it is determined to be a non-credible threat. Notified R1DO (b)(7)(C) and ILTAB (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03242	3/12/24	3	Clinton	IL	Power Reactor - Operating	Drone	Released All	Closed Unresolved	3/12/24	Drone Flyover	At 0528 CDT two security officers identified a drone with red and green lights flying above the protected area (PA) near the north perimeter. The drone was flying in a northerly direction and exited the PA, flew over the switchyard, and continued towards Route 54. The drone remained outside the plant air space and did not reenter. The entire observable flight lasted for 1 - 2 minutes. The FAA and Local Law Enforcement were notified. Per the FAA, no authorized activity was scheduled for the timeframe the UAV was observed flying over the facility. No reportability required, however, the licensee is voluntarily reporting this event. Notified R3DO (b)(7)(C) ILTAB (email), and the HOO SID Report Internal Distribution List (email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03241	3/6/24	3	Clinton	IL	Power Reactor - Operating	Drone	Released NRC Only	Closed Unresolved	3/8/24	Drone flyover	An unmanned aircraft system (UAS) was identified traveling across Clinton Lake inside of the buoys towards the owner controlled area (OCA). The UAS was seen with red and white running lights and traveling towards Route 54 and flying away from the plant. At no point was the UAS observed within the protected area. The UAS did not return to plant OCA space. Notified R3DO (b)(7)(C) and ILTAB (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03235	2/2/24	3	Quad Cities	IL	Power Reactor - Operating	Drone	Released All	Closed Unresolved	2/9/24	Drone	On February 2, 2024, at 1325 CST, a drone was observed flying over the Quad Cities Owner Controlled Area (OCA) from the north to the south. The drone had a black frame with flashing green and red lights. It hovered over the OCA in the vicinity of the weapon range for less than one minute before departing the OCA to the south. The licensee followed voluntary reporting requirements and notified the FAA and LLEA. The site security determined the flight was not suspicious. Notified R3DO (b)(7)(C) and SID Report Internal Distribution (email) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
SID-03238	2/4/24	1	Beaver Valley	PA	Power Reactor - Operating	Drone	Released All	Closed Unresolved	2/9/24	Drone Flyover	At 1818 EST on February 4, 2024, site security observed a drone fly over the protected area. The flight lasted three to five minutes. The drone had four lights and was one to three feet wide. Site security notified LLEA and FAA. The FAA reported that there was no authorized drone activity in the area. Notified R11DO (b)(7)(C) ILTAB (email), and the HOO SID Report Internal Distribution List (email). This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.

SID-03234	2/1/24	3	Quad Cities	IL	Power Reactor - Operating	Drone	Released All	Closed Unresolved	2/2/24	Drone Flyover	On February 1, 2024, at approximately 1845 CST a drone was spotted flying over the Quad Cities protected area approximately 100 yards in the air north to south over the site east trackway. NRC staff spoke with the site security. They documented the event in an incident report, contacted the FAA, and informed NRC. Per NRC’s Security Advisory 2021-06, the licensee stepped through the necessary voluntary reporting actions and the site determined the flight was not suspicious. However, it was decided that the information was worth sharing and documenting. The incident report is attached. Notified R3DO (b)(7)(C) and HOO SID Report Internal Distribution (E-mail) This report is open pending ILTAB/ILTAT review. ILTAB/ILTAT will update or close this report when appropriate.
