SUBJECT: STAFF REQUIREMENTS – BRIEFING ON NRC
REORGANIZATION FIRST 100 DAYS: ENHANCING REACTOR
AND MATERIALS OVERSIGHT INTEGRATION AND
PERFORMANCE (PUBLIC MEETING)

On October 15, 2026, the Commission was briefed by the staff on the continued effectiveness of the nuclear reactor and radioactive materials oversight programs and the changes implemented due to the NRC's reorganization.

The meeting, which was held in Region IV offices at 1600 East Lamar Boulevard, in Arlington, Texas at 9:00 a.m. Central Time, was open to members of the public attending in person and via webcast.

The Commission identified one requirement for staff action. Given the changes in the NRC's reactor oversight program (ROP) over the past decade, including the elimination of the annual Industry Trends Program report, changes to screening criteria, and reduced inspection activities, the staff should provide the Commission with an annual information paper on industry safety and security performance trends. The timing of this paper should align with established ROP assessment activities (e.g., end-of-cycle meetings or the Agency Action Review Meeting), with the first paper provided to the Commission no later than December 31, 2027.
