

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

October 29, 1999

Mr. John Daniels
Project Manager
Molycorp, Inc.
300 Caldwell Avenue
Washington, PA 15301

SUBJECT: CORRECTIONS TO LICENSE AMENDMENT NO. 3

Dear Mr. Daniels:

Pursuant to your telephone request of October 12, 1999, the U.S. Nuclear Regulatory Commission (NRC) staff has made the following corrections to Amendment No. 3 to License No. SMB-1393, for the Molycorp Washington facility.

- (1) 6.A. Byproduct, Source, and/or Special Nuclear Material referenced "Natural Uranium." This was a typographical error. Instead, 6.A. will read as "Natural Thorium."
- (2) License Condition 13. Reference was not made to your incoming letters of April 13 and 20, 1999. This was a typographical error. Instead, these letters will be added in Condition 14.D.

I have enclosed the revised license with corrections to 6.A. and License Condition 14.D. Please contact LeRoy Person at (301) 415-6701, if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Larry W. Camper".

Larry W. Camper, Chief
Decommissioning Branch
Division of Waste Management
Office of Nuclear Material Safety
and Safeguards

Docket No. 40-8778
License No. SMB-1393
