McGuire Nuclear Station Units 1 & 2
Docket Nos. 50 -369, 370
Report Pursuant to 10CFR50.46, Changes to or
Errors in an ECCS Evaluation Model

10 CFR 50.46 (a)(3)(ii) requires the reporting of errors or changes in the Emergency Core Cooling System (ECCS) evaluation models. For the period ending August 31, 1999, there are no errors or changes in either the Westinghouse or Framatome Technologies Incorporated (FTI) evaluation models that form the licensing basis for the McGuire and the Catawba Units. As such, the licensing basis peak cladding temperature (PCT) results are unchanged from the 1998 annual report.
