

LICENSEE: GPU Nuclear, Inc.

November 2, 1999

FACILITY: Oyster Creek Nuclear Generating Station

SUBJECT: MEETING SUMMARY OF DISCUSSION BETWEEN THE U.S. NUCLEAR REGULATORY COMMISSION (NRC) AND GPU NUCLEAR (GPU), INC. REGARDING THE PROPOSED SALE OF LAND BY THE OYSTER CREEK NUCLEAR GENERATING STATION (TAC NO. MA5644)

On September 15, 1999, members of the NRC staff held a conference call with members of GPU. A list of participants is enclosed. The purpose of the call was to discuss questions which resulted from the NRC's review of GPU's 50.59 evaluation associated with its proposed sale of land and equipment. GPU plans to sell a portion of the site and exclusion area and the gas turbines located within the exclusion area at Oyster Creek Nuclear Generating Station.

GPU indicated that it intended to proceed with the closing on the land sale. GPU does not intend to wait for the NRC to complete its review of their response. GPU is planning to proceed at its own risk and is willing to remediate this part of the land if deemed necessary to meet NRC regulations. The contract of sale addresses remediation of the property.

The staff asked GPU to obtain a commitment from the buyer not to disturb the property for up to 90 days. The staff also asked for access to complete its confirmatory surveying inspections, and monitoring of remediation, if necessary. The staff is planning to complete its review expeditiously, but the review is not expected to be completed before the projected date for closing.
