Unit Nos. 1 & 2; Docket Nos. 50-317 & 50-318  
Updated Final Safety Analysis Report, Revisions 25 and 26

---

Enclosed for your use are one original and ten copies of our Updated Final Safety Analysis Report (UFSAR), reflecting Revisions 25 and 26. This is the annual revision submitted in accordance with 10 CFR 50.71(e). The List of Effective Pages is included.

As part of this submittal, the Technical Requirements Manual (TRM), Chapter 15 of the UFSAR, has been removed from the UFSAR and placed in a plant document that is controlled by 10 CFR 50.59. A summary of the important points of the TRM remains in the UFSAR as Section 15.0. This UFSAR change follows the guidance in Nuclear Energy Institute publication NEI 98-03, "Guidelines for Updating Final Safety Analysis Reports," Revision 1, which was approved without exception by Regulatory Guide 1.181.

Please replace the appropriate pages of your copies of the UFSAR with the enclosed pages.
