Subject: NRC Export Application

Dear Mr. Hauber:

Please find enclosed a license application covering the proposed export of <sup>low</sup>high enriched UO<sub>2</sub> fuel pellets by Westinghouse Electric Company, LLC to the Halden Reactor Project in Norway. The quantity of material covers the supply of only fuel pellets which consists of 48.02 grams of U<sub>235</sub> enriched to 19.6% contained in 245 grams of uranium. The material does not contain any Canadian or Australian source material. BNFL received this material from the UK Ministry of Defense, so the enrichment is unknown, but the material is classified as "N"—Non-obligation.

A check for \$1,700 is enclosed covering the fee for this application request.

Please note: We are required by the customer, BNFL, to deliver the fuel pellets in November 1999, so please process this fuel application on an urgent basis.

Should there be any questions on this request, please call the undersigned at (412) 374-4754.

Sincerely,

Edward F. McDonough, Senior License Administrator  
Export Compliance
