B17909

Re:10 CFR 50.90

U. S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

Millstone Nuclear Power Station, Unit No. 3
Withdrawal of 24 Month Steam Generator Tube Inspection
Surveillance Extensions-Reference Revision

This correspondence serves to correct a reference that was noted in a letter from Northeast Nuclear Energy Company (NNECO) to the Nuclear Regulatory Commission (NRC) the subject of which is, "Withdrawal of 24 Month Steam Generator Tube Inspection Surveillance Extensions", dated October 5, 1999. In this regard, footnote (1) of our October 5, 1999 letter should be replaced with a reference to a letter from J. F. Opeka to the U.S. Nuclear Regulatory Commission, "Proposed Revision to Technical Specifications 24-Month Fuel Cycle - Containment Type B and C Testing and Steam Generator Tube Inspections and Request for Exemption from 10 CFR 50, Appendix J," dated May 1, 1995. Footnote (2) of our October 5, 1999 letter remains correct as is.

There are no regulatory commitments contained within this letter.

In the event the NRC Staff should have any questions or comments regarding this letter, please contact Mr. David W. Dodson at (860) 447-1791 extension 2346.

Very truly yours,

NORTHEAST NUCLEAR ENERGY COMPANY
