Gentlemen:

ULNRC-4152

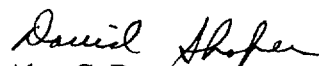

CALLAWAY PLANT
DOCKET NUMBER 50-483
AMENDMENT NUMBER 129

This is to inform the Commission of the implementation of Amendment No. 129 to the Callaway Facility Operating License No. NPF-30. Amendment No. 129 revised the operating license to reflect the rerack modification to the spent fuel pool. This amendment became effective as of its date of issuance on January 19, 1999 (supplemented by transmittal letters dated February 4, 1999 and June 15, 1999), and is now fully implemented with the completion of the spent fuel pool rerack modification. Full implementation occurred in advance of the December 31, 1999 date, stated in Item 3.0 of the SER for the approved amendment.

The Callaway FSAR will be revised to incorporate changes for the modification during the next scheduled update in accordance with 10 CFR 50.71(e). In addition, the offset handling tool, described in the subject amendment request will be fabricated after December 31, 1999. Because the offset handling tool is not a piece of permanent plant equipment, its fabrication is not a modification to the plant and is therefore not considered to be required for implementation of Amendment 129.

Very truly yours,

for 
Alan C. Passwater
