

FACILITY: Oyster Creek Nuclear Generating Station

SUBJECT: SUMMARY OF A MEETING WITH GPU NUCLEAR INCORPORATED AND NEW JERSEY RELATING TO THE RELEASE OF PART OF OYSTER CREEK NUCLEAR GENERATING STATION'S SITE (TAC NO. MA6935)

On October 20, 1999, the NRC staff with New Jersey met with GPU Inc., (licensee) at the Oyster Creek Nuclear Generating Station (OCNGS) at Forked River, New Jersey. The meeting was open to the public. The purpose of the meeting was to discuss the licensee's September 22, 1999, response to the NRC and other information addressing the release (sale) of land that is part of the Oyster Creek site.

The licensee presented an overview of the sale of the Oyster Creek site and discussed the safety evaluation supporting the sale, the radiological assessment, the effects on continued operation of Oyster Creek combustion turbines and supporting facilities.

The NRC discussed the steps it is taking to determine whether the land that the licensee is selling meets the criteria for unrestricted use.

The State of New Jersey also made a presentation on its role.

At the conclusion of the meeting, the NRC staff was available to answer questions or listen to comments from the public.

Enclosure 1 is the list of attendees. Enclosure 2 is a copy of the meeting's transcription. We would like to note that because of the court reporter's late arrival, the transcript begins about halfway through the meeting. However, all the handouts used for the presentations during the meeting are attached to the back of the transcript.
