SUBJECT: NRC INTEGRATED INSPECTION REPORT 50-354/99-06

Dear Mr. Keiser:

On October 10, 1999, the NRC completed an integrated inspection of your Hope Creek reactor facility. The enclosed report presents the results of that inspection. The preliminary findings were presented to PSEG Nuclear management led by Mr. Mark Bezilla in an exit meeting on October 20, 1999.

This inspection was an examination of activities conducted under your license as they related to reactor safety and compliance with the Commission's rules and regulations, and with the conditions of your license. The attached report documents the results of six weeks of resident inspection and three discrete region-based reviews of site physical protection, safety evaluations, and radiological environmental monitoring. Within these areas the inspection consisted of a selected examination of procedures and representative records, observations of activities, and interviews with personnel. There were no findings identified.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room (PDR).

Sincerely,

Original Signed By:

Glenn W. Meyer, Chief,
