SUBJECT: NRC INTEGRATED INSPECTION REPORT NOS. 50-335/99-06, 50-389/99-06

Dear Mr. Plunkett:

On October 2, 1999, the NRC completed an inspection at the St. Lucie 1 and 2 reactor facilities. The enclosed report presents the results of that inspection.

During the inspection period, your conduct of activities at the St. Lucie facility was generally characterized by safety conscious operations, strong implementation of inservice testing activities, and good coordination between different licensee work groups.

Based on the results of this inspection, the NRC has determined that three violations of NRC requirements occurred. These violations are being treated as non-cited violations (NCV), consistent with Appendix C of the Enforcement Policy. The NCVs are described in the subject inspection report. If you contest the violations or severity level of these NCVs, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington DC 20555-0001, with copies to the Regional Administrator, Region II, the Resident Inspector at your facility, and the Director, Office of Enforcement, United States Nuclear Regulatory Commission, Washington DC 20555-0001.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room (PDR).

Sincerely,

(Original signed by L. Wert)
