Docket No. 50-275, OL-DPR-80
Docket No. 50-323, OL-DPR-82
Diablo Canyon Units 1 and 2

Semiannual Material Status Reports for the Period Ending September 30, 1999, and
Corrected Semiannual Material Status Reports for the Period Ending March 31,
1999

Project Administrator:

Pursuant to 10 CFR 74.13(a)(1), Enclosure 1 contains the Material Balance Reports and Inventory Composition Report. These reports were prepared in computer-readable format in accordance with the instructions contained in NUREG/BR-0007, "Instructions for Completing Material Balance Report, Physical Inventory Listing and Concise Note Forms," and NMMSS Report D-24, "Personal Computer Data Input for NRC Licensees." The data on these forms provide inventories and changes at Diablo Canyon Power Plant (DCPP) Units 1 and 2 for the semiannual period ending September 30, 1999, for the following materials: (1) enriched uranium fuel; (2) plutonium in fuel; and, (3) enriched uranium in neutron flux detectors.

Pursuant to 10 CFR 74.15, Enclosure 2 contains the Nuclear Material Transaction Report. The report was prepared in computer-readable format in accordance with the instructions contained in NUREG/BR-0006, and NMMSS Report D-24. The data on these forms provide the receipt of new fuel, normal operational use of enriched uranium, and the production and decay of plutonium at DCPP for the semiannual period ending September 30, 1999.

Enclosure 3 is a diskette transmittal form identifying the five files which contain the reports specified above. The files were prepared in accordance with NMMSS Report D-24. The diskette is attached.

Also, enclosed is a similar a set of reports and a diskette for the period ending March 31, 1999. These enclosures correct data errors and supersede the previous submittals.

A001

POL A000K 05000275

These reports are being submitted 3 weeks late because the responsible engineering group was responding to fuel damage discovered during an October refueling outage, followed by a dual unit trip. On October 29, 1999, as discussed with Tom Headley and the NRC's Steve Bloom, PG&E proposed deferring this submittal to November 19, 1999. PG&E is taking actions to improve the timeliness and accuracy of these reports.

If you have any questions regarding the enclosures, please contact Darell L. Farrer at (805) 545-4438.

Sincerely,

David B. Miklush
