NRC Chairman Richard Meserve/U.S. NRC/Washington, DC 20555
Attention: Rulemaking and Adjudications Staff

Dear Mr. Meserve,

As a physiologist, I find the idea of releasing radioactive waste into market place items, unnecessarily risky. Because the human body is already exposed to background "natural" radioactivity, is not a justification for adding to our radioactive exposure. To reduce the cost of radioactive waste disposal one should reduce the generation of the waste. The nuclear power industry should be replaced with renewable power sources which are less of a threat to the environment and us. Thank you for your attention.

Sincerely,
Gail Sabbadini
