

DOCKETED
11/29/99

Dear Rulemaking and Adjudications Staff,

99 NOV 29 P4:01

I am shocked that you are seriously considering disposing of radioactive waste by recycling it where it will be manufactured into products without warning labels. We do not need this radioactive material circulating in consumer products. Please come to your senses and not simply go along with the nuclear power industry and rubber stamp this disasterous plan.

Sincerely,
Edward J Lawrence
Edward J Lawrence
