A number of exemptions have been granted to start cask fabrication prior to final approval of the certificate of compliance by the NRC. This rulemaking will allow construction prior to the casks final NRC approval provided it is constructed under an NRC approved quality assurance program and that the applicant bear, mainly financial, risks associated with early construction. This will eliminate staff time processing exemption requests which have been granted in the past.

The following is a summary of this request:

1. Title: Rulemaking plan: 10 C.F.R. part 72 - Clarification and Addition of Flexibility
2. Task Leader: G. Gundersen, NMSS/IMNS 415-6195
3. Working Group: F. Young, NMSS/SFPO 415-3207
N. Jensen, OGC 415-1637
4. Steering Group: No
5. Enhanced Public Participation: No
6. Compatibility for Agreement States: No
7. Requested Action: Office Concurrence
8. Requested Completion Date: Fourteen days after date of this memorandum. To meet the EDO due date a meeting will be tentatively scheduled for the week of June 8th. This meeting will be to discuss and resolve any issues and concerns that are delaying concurrence. Please plan having an official who can concur for your Office available for this meeting.
9. Resources and Coordination: It is anticipated that 1.9 NRC FTEs will be needed to complete this action (1.5 NMSS, and 0.4 all other). These resources are within existing budget allocations. Copies of this concurrence package have been forwarded to ACRS, ACNW, and IG for information.
