Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Proposed Physical Security Plan Change

This letter and its attachments supercede FPL letter L-99-121 in its entirety. In accordance with 10CFR50.54(p)(1) and 10CFR50.90, Florida Power and Light Company (FPL) requests to amend the Turkey Point Physical Security Plan (PSP). Specifically, FPL is requesting to modify the PSP requirements for compensation for a security computer failure, and to modify the PSP requirements for minimum security force staffing.

FPL has determined that the proposed plan changes do not involve a significant hazards consideration pursuant to 10CFR50.92. The no significant hazards determination in support of the proposed plan changes is provided in Attachment 1. A description of the change request is provided in Attachment 2. Attachment 3 provides the proposed revised PSP pages. In order to permit the publication of the request in the Federal Register, as required by 10CFR50.91, this cover letter is unclassified, and Attachment 1 is unclassified.

The proposed changes have been reviewed by the Turkey Point Plant Nuclear Safety Committee and the FPL Company Nuclear Review Board. Should there be any questions, please contact Bill Zinn at 305-246-6725.

Very truly yours,

R. J. Hovey
Vice President
Turkey Point Plant

NO SIGNIFICANT HAZARDS CONSIDERATION DETERMINATION

Introduction

FPL is requesting to modify the Physical Security Plan requirements for compensation for a security computer failure, and to modify the Physical Security Plan requirements for minimum security force staffing. The Nuclear Regulatory Commission has provided standards for determining whether a significant hazards consideration exists 10CFR 50.92 (c). A proposed amendment to a licensing document for a facility involves no significant hazards consideration, if operation of the facility in accordance with the proposed amendment would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. Each standard is discussed below for the proposed changes.

Discussion

- (1) **Operation of the facility in accordance with the proposed amendments would not involve a significant increase in the probability or consequences of an accident previously evaluated.**

These changes will not significantly affect the ability to detect a Protected Area intrusion. These changes do not affect the ability of a security response to an overt attack on the plant. These changes will not affect the ability of the security force to respond to contingency events. Therefore, the proposed changes do not affect the probability or consequences of accidents previously analyzed.

- (2) **Operation of the facility in accordance with the proposed amendments would not create the possibility of a new or different kind of accident from any accident previously evaluated.**

These changes do not affect the ability of the security force to defeat the design basis threat. The composition of the response organization is not effected by these changes.

- (3) **Operation of the facility in accordance with the proposed amendments would not involve a significant reduction in a margin of safety.**

The demonstrated level of dependability of the security system ensures that a significant reduction in effectiveness or margin of safety does not occur.

Based on the above, FPL has determined that the proposed changes do not (1) involve a significant increase in the probability or consequences of an accident previously evaluated, (2) create the possibility of a new or different kind of accident from any accident previously evaluated, or (3) involve a significant reduction in a margin of safety; and therefore the proposed changes do not involve a significant hazards consideration as defined in 10CFR50.92.
