**Subject:** RE: Request Information

Dear Seung;

I apologize for not getting back to you sooner regarding this matter. I have been in contact with Mr. Mike Ashland, the RSO at G.S. (Edwards Systems Technologies). I will prepare the information later today and submit this to you for your review. As a brief, the information does state that the 6250B is within the series 305 chamber construction. Mr. Ashland fax copied me several documents covering this device and process. I will put this together in a .pdf format later today and e-mail this to you. I can also mail a hard copy of all items within this package.

Regards,

Michael J. Emhof  
Radiation Safety Officer  
Dynalec Corporation

**Subject:** Request Information

Good morning, Michael!

Based on telephone conversation on 10/27/99, I'm supposed to know the relationship between Edwards Smoke Detector (G.S. Building Corp.) P/N 6250B and Dynalec P/N 63103-000 in a week. However, I did not get any information on this relationship so far. Without knowing the relationship, I can not review your amendment request any further. If I did not have any information from you by 11/27/99, I'll return your application due to the lack of information. If you have any questions, please let me know.

Thank you very much.

Seung Lee
