**Subject: Beaver Valley Power Station, Unit No. 2
Docket No. 50-412, License No. NPF-73
Change in Scheduled Completion Date for Commitment**

Corrective Action Number 15 of LER 50-412/99-006-00 dated August 16, 1999, stated that the event described in the subject LER and EDG stop pushbutton and key switch operation will be reviewed in Operator retraining and incorporated into initial Operator training by November 30, 1999. This material has been incorporated into the initial operator training program; however, the completion of the scheduled operator retraining cycle has been delayed due to the recent Beaver Valley Unit 2 forced outage. Therefore, the completion date for this action needs to be extended to December 31, 1999.

Please note that the above training was in addition to training that was provided to licensed operators on the lessons learned from the event. This action was described in Corrective Action Number 9 of the subject LER.

This change in commitment was discussed with the Senior Resident Inspector.

If there are any questions concerning this matter, please contact Mr. M. S. Ackerman, Manager, Safety & Licensing at (412) 393-5203.

Sincerely,

J. E. Cross
