Nuclear Regulatory Commission,
My name is Jessica Womer, a university student in Western Pennsylvania and a concerned citizen. I believe your proposition suggesting the allowance of radioactive wastes to be used, in an unrestricted manner for the manufacturing of anything...like such consumer products as jewelry, or cookware, or braces commonly administered to developing children, is nothing less than absurd! I demand that this proposition be declined, without a doubt.

OFFICE OF THE
FUEL
ADJUTANT GENERAL

Sincerely,
Jessica Womer
