**Re:** Nuclear industry metals enters consumer market  
**Comments:**

Sir/Madam,

I am deeply concerned for the news that the nuclear industry will be able to feed lots of waste to the metals recycling industry and finally entering the normal domestic market - where possible contaminated metals will then reach the general public.

I can see a terrible mistake has been made; we need to find a way out of the nuclear industry, rather than to facilitate its continued eternal use.

Regards and wishes of well being from Sydney,  
Robert,  
Author.
