OFF

ADJUTANT

DOCKET NUMBER
PROPOSED RULE **PR 20**
(64FR35090)

Secretary
U.S. Nuclear Regulatory Commission
Washington, D. C. 20535

Sir:

We are appalled that you would consider recycling radioactive metal for consumer products. Setting standards for acceptable doses of radiation is totally unacceptable to us; and we will do all in our power, both in our friendship and employment circles, to bring pressure on your Commission to oppose this kind of plan.

- 2 -

Your Commission should be protecting the public, not industry.

We await your response to our letter and our plea.

Sincerely,

Dr. & Mrs. M. Shore
