OFFICE OF THE
GENERAL COUNSEL
ADJUTANT GENERAL

Dear Sir:

I write with regard to the proposed rules for making safer nuclear power in this country by making some basic changes in the work place. Please work for the adoption of the following rules:

Rule #1, limiting the number of hours employees may work in a week. People who have responsibility for operating nuclear plants need to be in an alert condition, so that mistakes are less likely to happen which could endanger our population and our environment.

Rule #2, training on employee protection regulations for supervisors, managers, and directors to prevent fear from "whistle blowing" in the industry.

We believe these to be essential elements of a safe nuclear industry.

Thank you.

Sincerely,

Bonnie L. Wigen
