Gentlemen:

In accordance with 10CFR50.4, attached is the original plus three copies (Copy Nos. 1-4) of Revision 40 to the Arkansas Nuclear One (ANO) Industrial Security Plan (ISP). Copies five and six are being submitted to Region IV. This revision includes security organization structure changes, the closing of the secondary guard station and other minor administrative changes. This change does not contradict any regulatory requirements or commitments.

This change has been evaluated in accordance with 10CFR50.54(p). It has been determined that this change does not decrease the safeguards effectiveness of the ISP; therefore, prior Nuclear Regulatory Commission (NRC) approval is not required. The attached material describes current security measures and is considered to be safeguards information as defined by 10CFR73.21. The attached material should be handled accordingly.

Please note that these changes to the ANO ISP also affect the ANO specific safeguards plan submitted in the Entergy Operations Inc. (EOI) request dated September 7, 1999, which will implement a single Integrated Nuclear Security Plan (INSP). However, these changes do not alter the basis for NRC approval of the EOI INSP.

Very truly yours,

Jimmy D. Vandergriff
Director, Nuclear Safety

JDV/RMC
