Ms. Betty L. Wright
Export/Import Licensing Officer
Office of International Programs
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear Ms. Wright:

An application for an export license to transport natural uranium as natural uranium hexafluoride from AlliedSignal's Metropolis, Illinois facility to Urenco's plants in German, The Netherlands, and the U.K. is enclosed. The application covers a quantity of 2,000tU in the form of UF₆ that we currently project that our U.S. utility customers will provide us during the period of the application. It is known that we will need to ship Australian, Canadian, U.S., and Russian origin uranium but other origins may arise. The material will be enriched at Urenco's facilities and then returned to a U.S. fuel fabrication facility for ultimate use in a U.S. reactor.

Thank you for your attention to this matter. Please call Donald Miller or Kirk Schnobelen at (202) 337-6644 if you have questions regarding this application.

Sincerely,

Peter L. Lenny
