South Carolina Electric & Gas Company (SCE&G) acting for itself and as agent for the South Carolina Public Service Authority is providing an update of the Virgil C. Summer Nuclear Station's project to adopt and implement Revision 1 to NUREG 1431, the Westinghouse Standardized Technical Specifications.

Due to resource limitations, the initiation of the project has been delayed. The conversion project is still considered to be important, however, a date for commencement and submittal has not been established.

SCE&G will ensure that the NRC Project Manager is kept informed of the progress of the Technical Specification Conversion Program.
