Mr. Robert Brinkman
U. S. Atomic Energy Commission
Division of Licensing and Regulations
Isotope Branch
Washington, D. C. 20025

Dear Mr. Brinkman:

I understand that there has been a recent change to CFR 10 that permits leak testing requirements for certain licensed devices to be changed every three (3) years instead of six (6) months. Other than writing for an ammendment to a license, what considerations or conditions need to be met under this new change?

If possible, I would like a copy of this applicable change.

Please advise.

Sincerely,

A. A. Mammarelli, Jr.
Industrial Hygiene Engineer
