

BYPRODUCT MATERIAL LICENSE

Pursuant to the Atomic Energy Act of 1954 and Title 10, Code of Federal Regulations, Chapter 1, Parts 30, 32, 33, 34, and 35, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, own, possess, transfer and import byproduct material listed below; and to use such byproduct material for the purpose(s) and at the place(s) designated below. This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Atomic Energy Commission now, or hereafter in effect and to any conditions specified below.

Licensee			
1. Jones & Laughlin Steel Corporation Aliquippa Works		3. License number	KJ 37-15699-01
2. P.O. Box 490 Aliquippa, Pennsylvania 15001		4. Expiration date	July 31, 1978
		5. Reference No.	
6. Byproduct material (element and mass number)	7. Chemical and/or physical form	8. Maximum amount of radioactivity which licensee may possess at any one time	
A. Cesium 137	A. Sealed sources (Texas Nuclear Model 570-57157C)	A. 2 sources of 200 millicuries each	
9. Authorized use			
A. To be used in Texas Nuclear Model 5176 source holder to make water quality control measurements.			
CONDITIONS			
10. Byproduct material shall be used only at Jones & Laughlin Steel Corporation, Aliquippa Works, Aliquippa, Pennsylvania.			
11. The licensee shall comply with the provisions of Title 10, Chapter 1, Code of Federal Regulations, Part 20, "Standards for Protection Against Radiation."			
12. Byproduct material shall be used by, or under the supervision of, W. Gehacki or A. F. Thomas.			
13. Sealed sources containing byproduct material shall not be opened or removed from their respective source holders by the licensee.

CONTROLS

- IV. A(1) Each sealed source containing byproduct material, other than Hydrogen 3, with a half-life greater than thirty days and in any form other than gas shall be tested for leakage and/or contamination at intervals not to exceed three years. In the absence of a variance from a Commission finding that a test has been made within six months prior to the transfer, the sealed source shall not be put into use until tested.
- (2) The periodic leak test required by this condition does not apply to sealed sources that are stored and not being used. The sources exempted from this test shall be tested for leakage prior to any use or transfer to another person unless they have been leak tested within six months prior to the date of use or transfer.
- B. The test shall be capable of detecting the presence of 0.005 microcuries of radioactive material on the test sample. The test sample shall be taken from the sealed source or from the surface of the device in which the sealed source is permanently mounted or stored on which one might expect contamination to accumulate. Records of leak test results shall be kept in units of microcuries and maintained for inspection by the Commission.
- C. If the test reveals the presence of 0.005 microcuries or more of removable contamination, the licensee shall immediately withdraw the sealed source from use and shall cause it to be decontaminated and repackaged or to be disposed of in accordance with Commission regulations. A report shall be filed within 5 days of the test with the Directorates of Licenses, U. S. Atomic Energy Commission, Washington, D. C. 20445, describing the equipment involved, the test results, and the corrective actions taken. A copy of such report shall also be sent to Region I, Massachusetts of Regulatory Operations, 631 Park Avenue, Kitter of Prussia, Pennsylvania 19446.
- D. Tests for leakage and/or contamination shall be performed by the licensee or by other persons specifically authorized by the Commission or an Agreement State to perform such services.

CONDITIONS

13. Relocation and reinstallation of the source devices and servicing, maintenance, and repair of equipment other than the source holders shall be performed under the supervision of V. Gahocki.
14. Except as specifically provided otherwise by this license, the licensee shall possess and use byproduct material described in Items 6, 7, and 8 of this license in accordance with statements, representations, and procedures contained in application dated June 8, 1973.
