November 8, 1999

Mr. Ellis W. Merschoff
U.S. NRC, Region IV
611 Ryan Plaza Dr., Suite 400
Arlington, Texas 76011

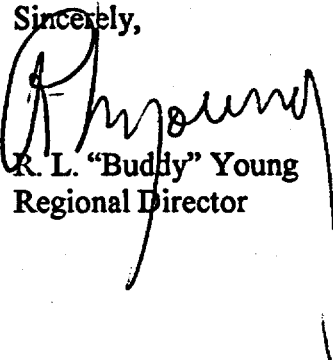

Dear Mr. Merschoff:

Enclosed is a copy of the Radiological Emergency Preparedness final report for the Comanche Peak Steam Electric Station's Ingestion Pathway Exercise conducted July 21-22, 1999, at Glen Rose, Texas.

There were no Deficiencies and no Areas Requiring Corrective Action (ARAC) identified during the exercise. Based on the results of the July 21-22, 1999, exercise, the off-site radiological emergency response plans and preparedness for the State of Texas and the affected local jurisdictions, site-specific to the Comanche Peak Steam Electric Station, can be implemented. They are deemed to be adequate to provide reasonable assurance that appropriate measures can be taken to protect the health and safety of the public in the event of a radiological emergency at the site. Therefore, the title 44 CFR, Part 350 approval of the off-site radiological emergency response plans and preparedness for the State of Texas site-specific to the South Texas Project Electric Generating Station will remain in effect.

A copy of this report has also been forwarded to Mr. Tom Essig at NRC Headquarters in Rockville, Maryland. Should you have questions, please contact Larry Earp, Region VI Regional Assistance Committee Chairman at 940-898-5240 or Brenda J. Mosley at 940-898-5344.

Sincerely,

R. L. "Buddy" Young
Regional Director
