 (TAC NOS. MA1769 AND MA1770)

Dear Mr. Terry:

The Commission has issued the enclosed Amendment No. 73 to Facility Operating License No. NPF-87 and Amendment No. 73 to Facility Operating License No. NPF-89 for Comanche Peak Steam Electric Station (CPSES), Units 1 and 2, respectively. The amendments consist of changes to the Technical Specifications (TS) in response to your application dated February 27, 1998, as supplemented by letters dated June 10, 1998, and October 22, 1999.

The amendments change the refueling water storage tank (RWST) low-low level setpoints in TS Table 3.3.2-1, "Engineered Safety Feature Actuation System Instrumentation" to increase the volume of water available to containment spray pumps when the containment spray system switches to the recirculation mode of operation.

A copy of our related Safety Evaluation is enclosed. The Notice of Issuance will be included in the Commission's next biweekly *Federal Register* notice.

Sincerely,
