Subject: Organizational Changes at Clinton Power Station

Dear Mr. Dyer:

This letter is to inform you of recent changes in the Clinton Power Station management organization. The Nuclear Safety and Performance Improvement (NSPI) Department functions have been distributed among other site departments. Therefore, the position of Manager - NSPI has been eliminated and Richard F. Phares has been assigned other duties. As a result of this change, the responsibility for reviewing and responding to allegations forwarded to Clinton Power Station by the Nuclear Regulatory Commission (NRC) has been assigned to the Manager - Quality Assurance, Mr. R. Mark Moore. Also, Mr. Michael A. Reandeau has replaced Mr. Joseph V. Sipek as the Director-Licensing.

Effective immediately, please add Mr. Reandeau and delete Mr. Phares and Mr. Sipek from future correspondence related to Clinton Power Station. Please direct all future correspondence concerning allegations to Mr. Moore.

Sincerely yours,

John P. McElwain
Chief Nuclear Officer
