DOCKET NUMBER  
PROPOSED RULE **PR 20**  
(64FR35090)

Dec. 5, 1999

'99 DEC 13 A9:23

Secretary  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555

OFFICE OF THE SECRETARY  
ADJUDICATIONS

Attention: Rulemaking and Adjudications Staff

Dear Staff:

As a member of Public Citizen, it has come to my attention that there is a plan by the Department of Energy and your Commission to dispose of radioactive waste by allowing it to be recycled into consumer products.

It is hard for me to believe that business interests would so completely override the greater good of American citizens as to make such an unhealthful and dangerous action even a possibility. Yet I have learned that it is already happening: such material is already being released on a case-by-case basis and is being manufactured into new products without any warning labels.

Such actions are frightening and unacceptable. I thought we already knew that exposure to radiation is to be avoided, and not promoted—much less by our own government.

I wish to go on record as being unalterably opposed to this plan, and to any actions already taken to advance the plan. I strongly urge that it be reconsidered and rejected.

Sincerely yours,

Hannah Stein
