The Engineering Branch, Division of Operating Reactors, reviewed Virginia Electric and Power Company's response to March 13, 1979 Show Cause Order for Surry Power Station Unit No. 1. The staff's Safety Evaluation Report recommending termination of this Order was provided by NRR to the Commission on August 22, 1979. Because of the extremely tight schedule to get this document to the Commission, we worked closely with D. Neighbors, Surry Unit No. 1 Project Manager, and did not officially transmit our input to you. That SER is attached to this memo in order to close out our file on this subject. Please make appropriate input into RAHS for the completion of the licensing action.
