Dr. W. H. Bland
Veterans Administration Center
Wilshire and Santa Monica Boulevards
Los Angeles 25, California

Dear Dr. Bland:

As you know, the program of radiological protection as administered by the Isotopes Extension of the Atomic Energy Commission includes routine visits to institutions allocated radioactive materials. I would like to visit with you on Wednesday afternoon, October 3, 1956, to review the radiological protection aspects of your radioisotopes program.

It is possible that a representative of the California State Board of Health may wish to accompany me on this visit.

Please advise me at your earliest possible convenience if the time of my proposed visit is not satisfactory for you.

Very truly yours,

Richard E. Cunningham
Field Representative
Radiological Safety Branch
Isotopes Extension
Division of Civilian Application
