Los Angeles 25, California
Subject: NOTICE OF LICENSING REQUIREMENT

file
C 14 on old authorization

Dear Sir:

Their present licenses should be sufficient

Our records indicate AUTHORIZATIONS FOR RADIOISOTOPE PROCUREMENT were issued to you prior to February 10, 1956. Since then, Federal Regulations governing radioisotopes have been revised. It is now necessary that a person have a license rather than an authorization to possess and use radioisotopes.

Notice is hereby given that authorizations for radioisotope procurement whose validity as byproduct material licenses was established by Section 30.40a (Title 10, Code of Federal Regulations, Part 30) "Licensing of Byproduct Material" will expire in 90 days. This means that if you possess byproduct materials (radioisotopes), or stored wastes on or after January 31, 1957 which are not included under a valid license an application for such license must be submitted by that date.

An application need not be submitted if no byproduct materials or stored wastes are possessed or if your program is completely covered by a valid license. In this case, the attached certificate should be completed, signed, and returned to the Isotopes Extension.

All other persons possessing byproduct materials or stored wastes not covered by a valid license should file application for a license in duplicate on the enclosed Form AEC-313 by January 31, 1957. The radioisotopes should be individually listed along with the amount of each possessed. Sealed sources of radioisotopes should be itemized under Item 7. All material may be included on a single application, using appended pages if necessary. Applications must be signed; however, notarization is no longer required.

The enclosed packet contains instructions, application forms, and a copy of pertinent Federal Regulations.

Because of the large volume of applications anticipated, there may be considerable delay before we can act on your application. Persons who submit complete applications on or before January 31, 1957, however, will be deemed to be properly licensed until action is taken thereon.

Very truly yours,

Paul C. Aebersold
Paul C. Aebersold, Director
Isotopes Extension
Division of Civilian Application

A/19

DEPARTMENT(S) Radioisotope Service and Hematology Lab. (Dr. Irwin M. Weinstein)

RESPONSIBLE RADIOISOTOPE USER(S)

William H. Bland, M.D.

The licensee and any individual executing this certificate on behalf of the licensee certify that:

_____ No byproduct materials or wastes are possessed by the licensee (excluding generally licensed quantities as defined in 10-CFR-30, Section 30.21, 30.71, 30.72.).

_____ All byproduct materials possessed by the licensee are covered by a valid Byproduct Material License.

_____ The isotopes used by Dr. Weinstein are procured and stored by the Radioisotope Service and used under the supervision of the undersigned.
