Rockville Maryland 20852

Dear Chairwoman Dicus,

The Millstone Nuclear Power Plant is a mere 14 miles from the shores of Long Island. This power plant has the **WORST SAFETY RECORD** of any plant in the country. It has been cited and fined by the NRC with numerous violations and mishaps have continued at an alarming rate.

The NRC has shown **NO CONCERN** for the residents of Eastern Long Island. Local representatives and residents attended the March hearing in Riverhead and cited the **NUMEROUS VIOLATIONS** that have occurred at the Millstone Nuclear plant. Officials also addressed the fact that there is **NO EVACUATION PLAN**. The emergency plan only includes a 10 mile radius. There is **NO ESCAPE** for the residents of Eastern Long Island. Our appeals fell on deaf ears once again when officials and residents voiced these same concerns in Washington D.C. last May.

One can only wonder, who is the NRC protecting? Is it not your responsibility to protect the residents of a community against such a dangerous situation? The Campaign against Millstone is growing everyday. Local governments have tabled resolutions calling for the closure of Millstone. The NRC's total disregard for the safety of the people of Eastern Long Island can not be tolerated.

As new Chairwoman of the NRC, I hope you will review all the facts in this matter and give the people of Eastern Long Island the respect and concern that is due and is the responsibility of your office.

Sincerely yours,

*Suzanne Bond*
