

For the Public Comment:

DOCKET NUMBER
PROPOSED RULE **PR 20**
(64FR35090)

207

DOCKETED
12/13/99

Secretary of the Commission
US NRC
Washington, D.C. 20555-0001

'99 DEC 13 P3:13

Dear Sir:

Two public comment items:

- 1) No BRC. For the 5th time in 15 years we, the people, say no. When will bureaucracy understand that no means no? Changing the form and or place of nuclear waste does not stop the deadly emission. No, not then, not now, not ever. No recycling (BRC).
- 2) I am in support of the 2 rules proposed by Union of Concerned Scientists to establish limits on employee working hours at nuclear power plants, and require owners to train managers & supervisors on the employee protection regulations.

These are essential to workers well-being/job performance which will essentially protect us from a nuclear power accident, when workers see something wrong, or something that needs fixed at the plant they should report it, free from harassment, intimidation, or job loss. They are there for our protection.

We had three family members die this year from cancer. Did someone dump nukes in the Wabash? I support UCS' (above) 2 proposed rules. Thank you for your cooperation in the matter.

Sincerely yours,
Alma Medsker
