DOCKET NUMBER
PROPOSED RULE **PR 20**
(64FR35090)

AD: December 6, 1999

Secretary U.S. Nuclear Regulatory Commission
Rulemaking and Adjudications Staff

Folks:

Do not allow recycling of radioactive materials that have a greater level of radiation than what the items had prior to exposure to man-made radioactive isotopes.

These items include copper, steel, aluminum and concrete.

No man made radioactive dosage is acceptable in recycled materials.

Exposure to radiation should be avoided as much as possible, not increased, and especially not through industry backed rulemaking.

Thank you

Don Riggs
