Dec. 6, 1999

Dear Sir/Ms:

Please don't tell us by your actions that you are about to come in to corporate interests with a public be damned attitude. As we understand it the NRC wants to dispose of radioactive waste by recycling it into consumer products. Regardless of the assumed safe tolerance levels we believe the only safe tolerance is "0". Would you personally want to eat with silverware for example made from recycled radioactive waste?? Please let your conscience rather than corporate pressure/money be your guide when making your decision. Thank You, Sincerely, *Douglas Wakefield*
