Dear Sir:

Two public comment items:

OFFICE OF
PUBLIC
ADJUSTMENT

- 1) No BCR. For the 5th time in 18 years we, the people, say no. When will bureaucracy understand that no means no? Changing the form and as place of nuclear waste does not stop the deadly emission. No, not then, not now, not ever. No recycling (BRC).
- 2) I am in support of the 2 rules proposed by Union of Concerned Scientists to establish limits on employee working hours at nuclear power plants, and require owners to train managers & workers on the employee protection regulations. There are essential to workers well being/job performance which will essentially protect us from a nuclear power accident, when workers see something wrong or something that needs fixed at the plant they should report it, free from harassment, intimidation, or job loss. They are there for our protection.

We had three family members die this year from Cancer. Did someone dump nukes in the trash?
I support UCS (above)'s proposed rule. Thank you for your cooperation in the matter.

Sincerely yours,
Alma Medsker
