Potomac, Md. 20854
December 6, 1999

Secretary of the Commission
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Dear Mr. Secretary:

I would like to raise my small voice to urge you to support the currently proposed rules to (1) ensure that nuclear plant workers are prevented from working excessively long hours that could lead to worker fatigue, and (2) require training of supervisors and managers in nuclear plants on employee protection regulations relating to reporting safety concerns.

I believe these rules are needed to assure that adequate safeguards against a nuclear accident are in place.

Thank you for considering my view.

Sincerely,

Donald McNellis, M.D.
