OFFICE OF
PUBLIC
ADJUDICATION

Dear Rulemaking And Adjudications Staff,

I am writing to you concerning the use of recycled radioactive metal. I believe no dose of this recycled metal is acceptable.

I do not and will not purchase any items made from recycled radioactive metal. The nuclear power and weapons industries should dispose of radioactive waste properly and not try to profit from recycling it. They are the ones producing the waste and should be the ones to responsibly dispose of it. If they cannot dispose it, these industries should move away from using this in the first place.

I strongly feel exposure to radiation should be avoided as much as possible, not increased through an industry-backed rulemaking!

Sincerely,
Mary Roiger
