

DOCKET NUMBER
PROPOSED RULE PR 20
(64FR35090)

URGENT

114 EVANS RD.
BRIGHTON, MA. 02135
DEC. 11, 1999

DOCKETED
DEC 13 99 12:12

To the Secretary, U.S. Nuclear Regulatory
I was horrified to read in the
PUBLIC CITIZEN NEWS that the DOE has
a contract with British Nuclear Fuels
Limited to recycle 200 million pounds of
radioactive nickel, copper, aluminum & steel.
And that this radioactive waste
was to be recycled into commercial
products.

Also, radioactive metal is already
being sold by the DOE to scrap metal dealers.
They have 1.4 million tons they plan to recycle.
The material is being manufactured into
new products without any warning labels.

Dr. John Gofman, CO-DISCOVERER of
isotopes of plutonium has shown that
there is NO zero radiation threshold -
every exposure increases chance of cancer
& genetic defects.

We have a growing cancer epidemic.
NO radioactive dose is acceptable.
Very worried. B. Latner
