

December 13, 1999

Mr. D. R. Gipson
Senior Vice President
Nuclear Generation
The Detroit Edison Company
6400 North Dixie Highway
Newport, MI 48166

SUBJECT: NRC RADIATION PROTECTION INSPECTION REPORT 50-341/99018(DRS)

Dear Mr. Gipson:

On November 19, 1999, the NRC completed an inspection at your Enrico Fermi 2 Nuclear Generating Plant. The purpose of the inspection was to review the plant's processing, storage, packaging, and transportation of radioactive waste. Implementation of the external dosimetry program was also reviewed. The enclosed report presents the results of that inspection. No violations of NRC requirements were identified.

The inspection was an examination of activities conducted under your license as they relate to radiation safety and to compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations of activities in progress.

The inspector found that, in general, your solid radioactive waste management, transportation and external dosimetry programs were well-implemented. Processing and storage of radioactive wastes were carried out in accordance with NRC regulations and plant procedures. In addition, radioactive waste shipments were properly classified, packaged, shipped, and documented using station procedures.

In accordance with 10 CFR 2.790 of the NRC's "Rules and Practice", a copy of this letter and its enclosure will be placed in the NRC Public Document Room (PDR).
